

This edited collection contains sixteen papers presented at the 12th METU International ELT Convention, “Celebrating Diversity”, held in 2015 in Ankara, Turkey. With the social, cultural and technological changes the 21st century has brought to our lives, every learner today has more diverse needs and expectations, which makes us consider the concept of “diversity” as one of the core points in English language education. Based on the core principle “One size does not fit all”, this volume presents a wide range of topics and covers issues related to diversity in student and teacher profiles, teaching and learning practices, assessment techniques, world Englishes and cultural elements in EFL/ESL classrooms. As such, the proceedings of the 12th METU International ELT Convention are an invaluable reference for those interested in diverse perspectives, applications and practices in the teaching of English as a foreign and second language.

Using a successfully class-tested approach that gives coherence to a broad range of introductory topics, this innovative text provides students with a real-world, big picture view of statistics as well as problem-solving strategies that can be applied to the statistical questions, real data, and examples that they will encounter. Author Nancy Pfenning organizes content around four basic processes of statistics: producing data, displaying and summarizing data, understanding probability, and using probability to perform statistical inference. Within this framework, the book progresses systematically through five basic problem situations involving values of variables (quantitative, categorical, or a blend). As a result, students learn to identify which situation applies and how to choose the correct display, summary, or inference tool or technique. As students gain proficiency in specific statistical techniques, the author also points out connections among topics and techniques. More than 1,000 real-life examples and categorized exercises support the approach, engaging students in practicing and developing a variety of skills. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Note: You are purchasing a standalone product; MyStatLab does not come packaged with this content. If you would like to purchase both the physical text and MyStatLab, search for ISBN-10: 0133864960/ISBN-13: 9780133864960. That package includes ISBN-10: 0321847997/ISBN-13:9780321847997, ISBN-10: 032184839X/ISBN-13:9780321848390 and ISBN-10: 0321924592/ISBN-13: 9780321924599. MyStatLab is not a self-paced technology and should only be purchased when required by an instructor. From SAT scores to job search methods, statistics influences and shapes the world around us. Marty Triola's text continues to be the bestseller because it helps students understand the relationship between statistics and the world, bringing life to the theory and methods. Essentials of Statistics raises the bar with every edition by incorporating an unprecedented amount of real and interesting data that will help instructors connect with students today, and help them connect statistics to their daily lives. The Fifth Edition contains more than 1,800 exercises, 89% of which use real data and 85% of which are new. Hundreds of examples are included, 91% of which use real data and 84% of which are new. New coverage of Ethics in Statistics highlights new guidelines that have been established in the industry.
