Effective Curriculum for Teaching L2 Writing sets out a clear big picture for curricular thinking about L2 writing pedagogy and offers a step-by-step guide to curriculum design with practical examples and illustrations. Its main purpose is to help pre-service and practicing teachers design courses for teaching academic writing and to do this as efficiently and effectively as possible. Bringing together the what and the how-to with research-based principles, what sets this book apart is its overarching focus on language pedagogy and language building. Part 1 examines curricular foundations in general and focuses on what is socially valued in L2 writing and pedagogy at school and at the college and university level. Part 2 is concerned with the nitty-gritty?—the daily realities of curricular design and classroom instruction. Part 3 takes a close look at the key pedagogical ingredients of teaching academic L2 writing: vocabulary and collocations, grammar for academic writing, and down-to-earth techniques for helping L2 writers to organize discourse and ideas. The Appendix provides an extensive checklist for developing curricula for a course or several courses in language teaching. The volume constitutes a state-of-the-art account of issues related to teaching, learning and testing speaking in a second language. It brings together contributions by Polish and international scholars which seek to create links between theory, research and classroom practice, report the findings of studies investigating the impact of linguistic, cognitive and affective factors on the development and use of speaking skills, and provide concrete pedagogic proposals for instruction and assessment in this area. As such, the book will be of interest not only to second language acquisition theorists and researchers, but also to foreign language teachers willing to enhance the quality of speaking instruction in their classrooms.

This book presents a participatory action research study exploring the social identity and academic literacies of bilingual preservice teachers. It describes the transformative experiences of undergraduate students during their participation in a program specially designed to develop bilingual teachers in Hawaii, USA. Further, it discusses how the curriculum and instruction in the classroom provide a 'third space' for facilitating peer interaction and critical reflection on such issues as academic literacy, heritage language education, and teacher identity. In doing so, it connects ideas of social identity and academic literacies of bilingual preservice teachers to the "real work" of mentoring and teaching PreK-12 students themselves.

In *Building Background Knowledge for Academic Achievement*, Robert J. Marzano shows how a carefully structured combination of two approaches—sustained silent reading and instruction in subject-specific vocabulary terms—can help overcome the deficiencies in background knowledge that hamper the achievement of many children. Readers will learn *

- The principles that underlie an effective sustained silent reading program
- * A five-step process for using sustained silent reading to enhance background knowledge
- * The defining characteristics of effective vocabulary instruction
- * A six-step process for direct instruction in vocabulary in each discipline
- * The vocabulary terms critical to students' success in every academic subject

Vignettes suggest how the recommended reading and vocabulary instruction programs might be implemented in elementary schools, middle and junior high schools, and high schools. The book also includes a list of 7,923 vocabulary terms culled from the national standards documents and other publications, organized into 11 subject areas and 4 grade-level categories. With its research-based recommendations and step-by-step approach, *Building Background Knowledge* equips educators with the tools they need to help close the achievement gap and enable all students to succeed.
