Joachim Häfele untersucht den Einfluss von urbanen Disorder-Phänomenen (Incivilities) auf die Furcht vor und die Einstellungen zu Kriminalität. Damit stehen das Disorder-Modell und/oder ähnliche Ansätze (z. B. Broken-Windows-Ansatz) zur Erklärung personaler Kriminalitätsfurcht auf dem Prüfstand. Mithilfe von statistischen Mehrebenenanalysen gelingt es dem Autor, eigenständige Effekte des sozialräumlichen Kontextes auf Kriminalitätsfurcht und personale Kriminalitätseinstellungen zu untersuchen. Die Ergebnisse zeigen u. a., dass Incivilities eine ambivalente und teilweise durchaus widersprüchliche Wirkung auf die Kriminalitätsfurcht haben. Insbesondere Social Incivilities oder abweichende Handlungen erhöhen die Risikoperzeption und führen zu einem Absinken des kriminalitätsbezogenen Sicherheitsgefühls. Social Incivilities, die häufig sichtbare Erscheinungsformen von Armut darstellen, werden immer stärker als allgemeine Bedrohung interpretiert, was sich auch in

Every year, hundreds of thousands of jailed Americans leave prison and return to society. Largely uneducated, unskilled, often without family support, and with the stigma of a prison record hanging over them, many if not most will experience serious social and psychological problems after release. Fewer than one in three prisoners receive substance abuse or mental health treatment while incarcerated, and each year fewer and fewer participate in the dwindling number of vocational or educational pre-release programs, leaving many all but unemployable. Not surprisingly, the great majority is rearrested, most within six months of their release. What happens when all those sent down the river come back up--and out? As long as there have been prisons, society has struggled with how best to help prisoners reintegrate once released. But the current situation is unprecedented. As a result of the quadrupling of the American prison population in the last quarter century, the number of returning offenders dwarfs anything in America's history. What happens when a large percentage of inner-city men, mostly Black and Hispanic, are regularly extracted, imprisoned, and then returned a few years later in worse shape and with dimmer prospects than when they committed the crime resulting in their imprisonment? What toll does this constant churning exact on a community? And what do these trends portend for

public safety? A crisis looms, and the criminal justice and social welfare system is wholly unprepared to confront it. Drawing on dozens of interviews with inmates, former prisoners, and prison officials, Joan Petersilia convincingly shows us how the current system is failing, and failing badly. Unwilling merely to sound the alarm, Petersilia explores the harsh realities of prisoner reentry and offers specific solutions to prepare inmates for release, reduce recidivism, and restore them to full citizenship, while never losing sight of the demands of public safety. As the number of ex-convicts in America continues to grow, their systemic marginalization threatens the very society their imprisonment was meant to protect. America spent the last decade debating who should go to prison and for how long. Now it's time to decide what to do when prisoners come home.

This book explores the potential of domestic abuse data to assess the level of harm caused to victims and the amount of resources required to respond to it. Policing domestic abuse has become a major activity for the police service in England and Wales. Part of the police strategy is to gather hundreds of thousands of detailed records about victims and suspects – the single largest set of domestic abuse records available, but one that to date has largely unexplored by researchers. this volume, Matthew Bland and Barak Ariel analyse three substantial datasets taken from police forces across the country and ask: · Can police data be used to derive meaningful insight? · How should we use these data to measure harm? · Just how much domestic abuse involves a repeat victim? · Does abuse get more serious over time? · Can serious domestic abuse be predicted before it occurs? This volume illustrates the scale of the challenge the police and other agencies face with reducing domestic abuse. A small proportion of individuals generate a majority of harm; this book argues that police records offer opportunities to identify these individuals before the harm occurs.

Demonstrating that statistical techniques can be used to profile domestic abuse to target harm reduction strategies more precisely and even identify a sizable proportion of serious cases before they occur, this volume will be of interest to law enforcement officials, policing researchers, and policy makers interested in reducing the phenomenon of domestic abuse.

In the last decade the world has witnessed a frightening surge in mass murders and serial killings. This rash of multiple murders - in the sheer number of body counts and volume of blood spilled - has shocked civilized society. With each new discovery of another serial killer, the level of brutality and gore seems to sink us even deeper into the abyss of inhumanity. Why this sudden proliferation of multiple murders, be they the bloody trail of carnage of a serial murderer or the unexpected deadly explosion of a mass murderer? What makes someone go on a murderous rampage? How do serial killers and mass murderers differ? Criminologists James Alan Fox and Jack Levin - the nationally renowned authorities on multiple murder - have led the field in investigating these phenomena for over a decade. In this absorbing work, they hold a magnifying glass to the minds of the perpetrators of these hideous crimes to explain the seemingly inexplicable. They produce profiles of the kinds of people who follow these murderous paths and examine the reasons behind their vicious acts. They also describe the latest law enforcement methods used to track down these heinous killers. What could possibly motivate the seemingly ordinary - Jeffrey Dahmer - to lure victims to his home so he could drug, lobotomize, sexually assault, and then devour them? What could explain why Daniel Rolling committed the horrifying and grisly murders of students at the University of

Florida in Gainesville? What could have motivated Joel Rifkin - avid gardener and "boy next door" - to strangle victim after victim? Did Colin Ferguson "go berserk" when he emptied two cartridges of bullets into the bodies of his fellow passengers on the Long Island Railroad? What could drive James Huberty to walk into a fast-food restaurant in southern California and cold-bloodedly murder the patrons in a stream of bullets? - a not uncommon event these days. Fox and Levin probe these and other provocative questions as they explore why multiple-murder sprees are erupting not only with greater frequency, but in more gruesome ways, both here and abroad. The authors leave no stone unturned in examining the psychological, sociological, and biological explanations behind these savage misdeeds. They investigate what prompts some people from "dysfunctional" families to become "killers" on Wall Street while others become killers. This engrossing book is the culmination of years of original research as well as one-on-one interviews with mass and serial murderers. Because of the unparalleled breadth of its subject matter and its penetrating and thorough analysis, this groundbreaking work is destined to become a classic in the annals of criminology.

Ahire (criminology, Ahmadu Bello U., Nigeria) recounts how the police under the British colonial government played a major role in the economy, public order, and hygiene. They protected foreign, extractive enterprises, high taxes, and low wages; helped displace indigenous authorities by the central state with foreign-determined boundaries; and enforced hygienic standards to prevent the spread of disease, which also facilitated the diffusion of European moral and religious concepts.
