*Curriculum and Teaching Dialogue (CTD)* is a publication of the American Association of Teaching and Curriculum (AATC), a national learned society for the scholarly field of teaching and curriculum. The field includes those working on the theory, design and evaluation of educational programs at large. At the university level, faculty members identified with this field are typically affiliated with the departments of curriculum and instruction, teacher education, educational foundations, elementary education, secondary education, and higher education. CTD promotes all analytical and interpretive approaches that are appropriate for the scholarly study of teaching and curriculum. In fulfillment of this mission, CTD addresses a range of issues across the broad fields of educational research and policy for all grade levels and types of educational programs.

This book unpacks data from conversations with bi-/multilingual EFL teachers whose L1s are languages other than English and who are from understudied contexts – Argentina, Egypt, Estonia, Senegal, Turkey, Ukraine, and Vietnam – to provide insights into the formation of ideal teacher selves. The author discusses the complexities surrounding the development of the teachers' selves and motivation, as well as their intertwinement with the sociopolitical realities of their individual contexts. The work reveals how these realities, and the specific social interactions that occur therein, influence the language learning and teaching processes; it also challenges the notions of and the need for a native/non-native speaker dichotomy in the field. Expanding on

Ushioda's (2009) person-in-context approach and reflecting on the multilingual settings of the teachers, the integration of the context-specific politics of language learning and teaching is a fresh approach to work in motivation.

This research topic stems from the "Interdisciplinary Approaches to Multilingualism" conference, which was hosted by the Language Research Centre at the University of Calgary. It was the first conference of its kind, which brought together the work of researchers, educators, and policy makers in the areas of first and second language acquisition from psycholinguistic and pedagogical perspectives. The goal was to provide an opportunity for participants to engage with the implications of multilingualism from a range of perspectives, including the effects of being bilingual from infancy to adulthood, the process and benefits of learning multiple languages, and the impact of multilingualism on society.

An accessible and wide-ranging consideration of concerns facing English Studies in its surrounding context of the university and society. The contributors to this volume seek to trace, in the face of current challenges, historical and contemporary debates surrounding English Studies.

The vision of this book has been to represent the work of educators and scholars invested in moving education beyond insular models of language study and cultural awareness to more globally representative and inclusive interactions that range from the studied word to the lived experience, and from reading the word to read the world (Freire & Macedo, 1987). A fundamental aspect of this vision is to recognize the living nature of language and its intricate role in culture. Culture is mediated through language (Hauerwas, Skawinski, & Ryan, 2017, p. 202) and the linguistic experience of difference is essential for developing cultural competence beyond surface culture considerations. The editors of this volume are committed to a closer bond between literacy learning and cultural competencies, particularly when literacy practices

and education are often characterized by quantifiable standards and accountability restraints. Readers of this volume will find meaningful and practical approaches to engage with learners from their earliest encounter with language(s), through adolescence and adulthood, and across ever-changing local and global communities.

This book constitutes the Proceedings of the Computational Intelligence in Information Systems conference (CIIS 2016), held in Brunei, November 18–20, 2016. The CIIS conference provides a platform for researchers to exchange the latest ideas and to present new research advances in general areas related to computational intelligence and its applications. The 26 revised full papers presented in this book have been carefully selected from 62 submissions. They cover a wide range of topics and application areas in computational intelligence and informatics.

This textbook takes a Complex Systems Theory approach to examine individual differences between learners and the potential impact of these variables on the process of acquiring a second language. The authors argue that individual variables cannot provide the complete picture, and that they must instead be understood as part of an interconnected and dynamic system of different factors in order to be useful in a language learning context. Written in an accessible style and suitable for final-year undergraduate and Masters-level students, the book includes clear definitions of key terms, discussion questions for classroom use, practical exercises and activities, and examples of real empirical studies that students and teachers can replicate in their own contexts. This textbook will be of interest to students taking TESOL and SLA courses and modules, as well as those on broader Applied Linguistics programmes. In this collection of real-life, personal narratives on the theme of language and globalization, scholars from a range of different sub-disciplines of linguistics, time periods, and geographical spaces throughout the world examine the interaction and intersectionality of languages and globalization and the implications of such interactions for world languages and cultures. A feature of the book is the application of autoethnography as its underlying approach/method, in which contributors draw on their own lived experiences (of life, scholarship, and work) to investigate and reflect on linguistic globalization and its issues and challenges against the backdrop of the globalized world of the 21st century.

This book contains papers in the fields of collaborative learning, new learning models and applications, project-based learning, game-based education, educational virtual environments, computer-aided language learning (CALL) and teaching best practices. We are currently witnessing a significant transformation in the development of education and especially post-secondary education. To face these challenges, higher education has to find innovative ways to quickly respond to these new needs. There is also pressure by the new situation in regard to the Covid pandemic. These were the aims connected with the 23rd International Conference on Interactive Collaborative Learning (ICL2020), which was held online by University of Technology Tallinn, Estonia from 23 to 25 September 2020. Since its beginning in 1998, this conference is devoted to new approaches in learning with a focus on collaborative learning. Nowadays the ICL conferences are a forum of the exchange of relevant trends and research results as well as the presentation of practical experiences in Learning and Engineering

Pedagogy. In this way, we try to bridge the gap between 'pure' scientific research and the everyday work of educators. Interested readership includes policymakers, academics, educators, researchers in pedagogy and learning theory, school teachers, learning industry, further and continuing education lecturers, et cetera.

This book presents the latest research on understanding language teacher identity and development for both novice and experienced researchers and educators, and introduces non-experts in language teacher education to key topics in teacher identity research. It covers a wide range of backgrounds, themes, and subjects pertaining to language teacher identity and development. Some of these include the effects of apprenticeship in doctoral training on novice teacher identity; the impacts of mid-career redundancy on the professional identities of teachers; challenges faced by teachers in the construction of their professional identities; the emerging professional identity of pre-service teachers; teacher identity development of beginning teachers; the role of emotions in the professional identities of non-native English speaking teachers; the negotiation of professional identities by female academics. *Advances and Current Trends in Language Teacher Identity Research* will appeal to academics in ELT/TESOL/applied linguistics. It will also be useful to those who are non-experts in language teacher education, yet still need to know about theories and recent advances in the area due to varying reasons including their affiliation to a teacher training institute; needs to participate in projects on language teacher education; and teaching a course for pre-service and in-service language teachers.

Building on the foundation set in Volume I—a landmark synthesis of research in the field—Volume II is a comprehensive, state-of-the-art new volume highlighting new and emerging research perspectives. The contributors, all experts in their research areas, represent the international and gender diversity in the science education research community. The volume is organized around six themes: theory and methods of science education research; science learning; culture, gender, and society and science learning; science teaching; curriculum and assessment in science; science teacher education. Each chapter presents an integrative review of the research on the topic it addresses—pulling together the existing research, working to understand the historical trends and patterns in that body of scholarship, describing how the issue is conceptualized within the literature, how methods and theories have shaped the outcomes of the research, and where the strengths, weaknesses, and gaps are in the literature. Providing guidance to science education faculty and graduate students and leading to new insights and directions for future research, the *Handbook of Research on Science Education, Volume II* is an essential resource for the entire science education community.
