This Handbook brings together the latest research on applied market design. It surveys matching markets: environments where there is a need to match large two-sided populations to one another, such as law clerks and judges or patients and kidney donors.

As developing and transition economies enter the next phase of reforms, labor market issues increasingly come to the fore. With the increased competition from globalization, the discussion is shifting to the need for greater labor market flexibility and the creation of "good" jobs.

Moreover, the greater actual and perceived insecurity in labor markets has generated a new agenda on how to structure safety nets and labor market regulation. The older questions of the links between the formal and informal labor market, reappear with new dimensions and significance. More generally, it is clear that an accurate understanding of how labor market structures function is essential if we are to analyze alternative policy proposals in the wake of these concerns. Oddly enough, in spite of this great importance, there are no recent monographs that bring together rigorous studies produced by academic researchers on these various issues. This book fills that gap. Under the steely editorship of Ravi Kanbur and Jan Svejnar, the contributors flourish in their attempts to enliven these debates.

How the fear of malpractice affects mothers and reproductive choices Giving birth is a monumental event, not only in the personal life of the woman giving birth, but as a medical process and procedure. In *The Business of Birth*, Louise Marie Roth explores the process of giving birth, and the ways in which medicine and law interact to shape maternity care. Focusing on the United States, Roth explores how the law creates an environment where medical providers, malpractice attorneys, and others limit women's rights and choices during birth. She shows how a fear of liability risk often drives the decision-making process of medical providers, who prioritize hospital efficiency over patient safety, to the detriment of mothers themselves. Ultimately, Roth advocates for an approach that protects the reproductive rights of mothers. A comprehensive overview, *The Business of Birth* provides valuable insight into the impact of the law on mothers, medical providers, maternity care practices, and others in the United States.

Reform of American education is largely motivated by concerns about our economic competitiveness and American's standard of living. Yet, few if any of the public school reform agendas incorporate economic principles or research findings. *Improving America's Schools* explores how education and economic research can help produce, in the words of Harvard's Dale W. Jorgenson, "a unified framework for future education reform." This book presents the perspectives of noted experts, including Eric A. Hanushek, author of *Making Schools Work*, on creating incentives for improved school and student performance; Under Secretary of Education Marshall S. Smith on the Clinton Administration's reform program; and Rebecca Maynard, University of Pennsylvania, on the education of the disadvantaged. This volume explores these areas The importance of schooling to labor market success. The prospects for combining school-based management with teacher incentives to gain the best of both approaches. The potential of recent innovations in student achievement testing, including new "value-added" indicators. The economic factors involved in maintaining an adequate stock of effective teachers. The volume also explores why, despite similar standards of living, France, the Netherlands, England, Scotland, and the United States produce different levels of education achievement. *Improving America's Schools* informs the current debate over

school reform with a fresh perspective, examples, and data. This readable volume will be of interest to policymakers, researchers, educators, and education administrators as well as economists and employers--it is also readily accessible to concerned parents and the larger community.
