Look, Listen, Learn, LEAD: A District-Wide Systems Approach to Teaching and Learning in PreK-12 lays out the transformational journey of Hampton City Schools (HCS), an urban school division of 30 schools in southeastern Virginia. Our school district faces numerous challenges, such as 62% of students receiving free and reduced-price lunch and 14% of students holding an IEP, and in 2015-2016, Hampton City Schools' state accreditation rate was approximately half the statewide rate and on a downward trend. In only three years, that was turned around and HCS exceeded the statewide accreditation rate, a more than 100% improvement with 100% of our schools accredited without conditions. We attribute this in large part to our dedicated educators and their implementation of district-wide systems for curriculum, instruction, checking for student understanding, climate, and culture. The goal of this book is to break down the process of what it takes to bring about large-scale educational change that is sustainable. We describe a process for developing a strong mission and vision to undergird the work around a variety of district-wide systems. This book provides insights into how to improve climate and culture, create a guaranteed and viable written curriculum, establish a process for evaluating its implementation, and create a balanced assessment framework to measure student success. Complete with example templates, action plans, and lessons learned, this book is a true example of theory-into-practice to bring about sustained improvement for all learners.

More than a decade into the 21st century, teachers continue to struggle with designing digital assignments as a viable tool for learning and with assessing the demonstration of that learning through student-created products. Digital tools continue to be used primarily for consumption of available resources rather than in the creation of something new. This publication explores what types of assignments are worth engaging online, how teachers and students can leverage global interactions to improve their work, and how teachers can assess digital projects and other work. Along the way, Fisher offers practical advice on rigor and relevance, digital citizenship, formative assessment, and digital portfolios. With instructional strategies and examples of real student work

across the content areas, Digital Learning Strategies will allow readers to develop an understanding of the what, when, why, and how of digital assignments and assessments.

Now the largest and fastest-growing ethnic population in the U.S., Latino students face many challenges and complexities when it comes to college choice and access. This edited volume provides much needed theoretical and empirical data on how the schooling experiences of Latino students shape their educational aspirations and access to higher education. It explores how the individual and collective influence of the home, school and policy shape the college decision-making process. This unique collection of original scholarly articles offers critical insight on educational pathways that will help families, educators and policy makers intervene in ways that foster and sustain college access and participation for Latino students. It considers destination preferences and enrollment selections, elementary and secondary school experiences, and intervention programs that shed light on how practitioners can promote participation and retention. This multi-conceptual, multi-methodological volume offers directions for future research, programming and policy in Latino education.
