

Horizons Canada Moves West Chapter 2

EBONY is the flagship magazine of Johnson Publishing. Founded in 1945 by John H. Johnson, it still maintains the highest global circulation of any African American-focused magazine.

David Cronenberg as moved from the depths of low-budget exploitation horror to become one of North America's most respected movie directors. Since the early 1970s, the soft-spoken 'Baron of Blood' has attracted widespread controversies with a steady stream of shocks - sec-crazed parasites in *Shivers* (1975), exploding heads in *Scanners* (1981), revolutionary flesh technology in *Videodrome* (1983), mutating bugs in *The Fly* (1986), car crash scars in *Crash* (1996), and psychopathic bursts of gunfire in *A History of Violence* (2005). This new study provides an overview of Cronenberg's films in the light of their international reception, placing them firmly in the cultures they influenced. It also highlights often-ignored works, such as the race movie *Fast Company* (1979), and includes a chapter on the latest film *Eastern Promises* (2007). Amidst bans and boos, Cronenberg has developed a consistent cult following for his chronicles of humankind's struggle with its ever-changing environment, bugged by technology and changing social roles - becoming a hero of contemporary

culture.

Leading scholars provide illuminating and engaging perspectives on a long neglected, yet incredibly eventful, period (1930-1965) of Asian American literature.

How should citizens of the world respond to the emergence of the United States as the planet's sole superpower and the military, commercial, and cultural centre of a new kind of global empire? This question poses the central dilemma of our time: How can we elaborate a global rule of law based on principles of equality and democracy when the world's most powerful polity seemingly acknowledges no higher authority in the international arena than its own domestic priorities? For Anthony Hall the answer lies in the concept of the Fourth World, an inclusive intellectual tent covering a wide range of movements whose leaders have sought to implement alternative visions of globalization to those that have prevailed since the Columbian conquests began in 1492. Its basic principles include recognition of the inherent rights of all peoples to self-determination and an enlightened embrace of the ecology of biocultural diversity. role of the United States began at its founding. The Royal Proclamation of 1763, which offered a qualified recognition of Aboriginal and treaty rights, infuriated many Anglo-American colonists. Their resulting sense of grievance was articulated in the

Declaration of Independence which proclaims the inalienable rights of all men even as it accuses King George III of having endeavoured to bring on the inhabitants of our frontiers the merciless Indian savages. The United States has never faced, let alone resolved, this fundamental contradiction in its founding document. This failure manifested itself in the lawlessness and militarism that characterized US treatment of Indigenous peoples in the most formative phase of the country's frontier expansionism. The exclusion of savages from the republic's founding ideals of human equality came increasingly to permeate US foreign policy, culminating in the ethnic and religious prejudices colouring the so-called War on Terrorism. policies toward Aboriginals that have done much to shape the interconnected histories of the United States, Canada, Latin America, South Africa, Australia, New Zealand, and many other countries.

Provides practical applications of democratic teaching for classes in history/social studies education, multicultural and social justice education, community service and civic engagement, and education and public policy. We, the Students and Teachers shows history and social studies educators how to make school classrooms into democratic spaces for teaching and learning. The book offers practical strategies and lesson ideas for transforming democratic theory into instructional practice. It stresses the importance of students and teachers

Read Book Horizons Canada Moves West Chapter 2

working together to create community and change. The book serves as an essential text for history and social studies teaching methods courses as well as professional development and inservice programs for history and social studies teachers at all grade levels. “The key to the excellent potential of this book is its assertion that democratic teaching can be linked to content, especially historical content, not just to a generic notion of ‘student-centered instruction.’ The theory-to-practice emphasis is very explicit, as is the emphasis on the voices of the teachers and students who participated in the research. The book also takes a highly creative approach to its topic that I find very refreshing.” — Elizabeth Washington, University of Florida “This is an important book. Maloy and LaRoche reveal the challenges that face historians as we grapple with increasingly fraught public and political perceptions of our discipline. Their strategies for reconstituting the classroom as a laboratory for instilling democratic values and practices are both ingenious and practical.” — Dane Morrison, author of *True Yankees: Sea Captains, the South Seas, and the Discovery of American Identity*

In *The American Empire and the Fourth World* Anthony Hall presents a sweeping analysis of encounters between indigenous people and the European empires, national governments, and global corporations on the moving frontiers of

globalization since Columbus "discovered America." How should we respond to the emergence of the United States as the military, commercial, and cultural centre of a global empire? How can we elaborate a global rule of law based on equality and democracy when the world's most powerful polity acknowledges no higher authority in the international arena than its own domestic priorities? For Hall the answer lies in the concept of the Fourth World, an inclusive intellectual tent covering a wide range of movements whose leaders seek to implement alternative views of globalization. Larger than any earlier political movement, the Fourth World embraces basic principles that include the inherent rights of self-determination and a more just approach to the crafting and enforcement of international law.

Canadian theorists and philosophers are recognized internationally for their contributions to normative debates about citizenship, multiculturalism, and nationalism. The fact that some of these thinkers are better known abroad than they are at home, provided the impetus for Ronald Beiner and Wayne Norman to bring together new essays in a unique, single volume. The essays collected in *Canadian Political Philosophy* reflect a broad range of contemporary political and philosophical issues: liberalism and citizenship; equality, justice, and gender; minority rights, multiculturalism, and identity; nationalism and self-determination;

and finally, topics in the history of political philosophy. This edition documents the impact that Canadian theorists are having in political philosophy debates and provides an outline of the themes around which Canadian theory is focused. Many of these themes arise out of a particular Canadian consciousness--for instance, constitutional crises have cultivated an interest in the nature of political membership--but are also emerging as themes in societies around the world. Canadian Political Philosophy demonstrates how contemporary Canadian theory is both a reflection of Canadian experience and an important voice contributing to the world-wide debates in political philosophy.

This is a collection of biographical essays on the twelve premiers who led the province of Alberta during the twentieth century.

This illustrated study shows how frontier life shaped children's character. What role should national militaries play in an increasingly globalised and interdependent world? This book examines the often difficult transition they have made toward missions aimed at protecting civilians and promoting human security, and asks whether we might expect the emergence of armed forces that exist to serve the wider human community.

Illustrated history of Canada and its people.

This expanded, fully updated second edition of the leading textbook in pedology

and soil geomorphology is invaluable for anyone studying soils, landforms and landscape change.

This book calls attention to an urgent need for postcolonial feminist approaches to practical theology. It not only advocates for the inclusion of colonialism as a critical optic for practical theology but also demands a close look at how colonialism is entangled with issues of race, ethnicity, gender, class, disability, and sexual orientation. Seeking to highlight the importance of the interdependence of life, the author challenges and contests the notion of independence as the desirable goal of the human being. Lifting up the experiences of overlooked groups--including children at adult-centered worship, queer and interracial youth in heterosexual and white normative family discourse, and non-human species in human-centered academic and theological realms--the book contributes to expanding the concerns of practical theology in ways that create healthy community for all human beings and non-human fellow creatures. It also takes up issues of multiple religious belonging and migration that practical theology has not sufficiently explored. These illuminating new possibilities promise to renew and even transform church communities through the inclusion of often-neglected groups with whom God is already present.

Territorial autonomy in Spain has reached a crossroads. After over thirty years of development, the consensus regarding its appropriateness has started to crumble. The transformation project embodied by the reform of Statute of Catalonia (2006) has failed

Read Book Horizons Canada Moves West Chapter 2

to achieve its most significant demands. Although the concept of Spain as a Federation is disputed -more within the country than beyond-, the evolution of the Spanish system needs to follow a markedly federalist path. In this perspective, reference models assume critical importance. This edition gathers the works of a broad group of European, American and Spanish experts who analyse the present-day challenges of their respective systems. The objective, thus, is to contribute ideas which might help to address the evolution of the Spanish system in the light of the experience of more established Federations. This second volume focuses its attention on the difficulties and challenges faced in two particular fields. On the one hand, the field of intergovernmental relations and, on the other, questions related to the integration and acknowledgement of diversity and of Fundamental Rights, with special reference to the cases of Canada and Spain. Finally, there is analysis of other specific aspects of the system of territorial autonomy in Spain.

Jaqueline Tyrwhitt's life story is truly a gap in the planning and urban design literature: while largely unacknowledged, she played a central role in twentieth-century design history. Here, Ellen Shoshkes provides a full and insightful appraisal of the British town planner, editor, and educator who was at the center of the group of people who shaped the post-war Modern Movement. Beginning with an examination of her early work planning for the physical reconstruction of post-war Britain, Shoshkes argues that Tyrwhitt forged a highly influential synthesis of the bioregionalism of the pioneering

Read Book Horizons Canada Moves West Chapter 2

Scottish planner Patrick Geddes and the tenets of European modernism, as adapted by the Mars group, the British chapter of CIAM. The book traces Tyrwhitt's subsequent contribution to the development of this set of ideas in diverse geographical, cultural and institutional settings and through personal relationships. In doing so, the book also sheds light on Tyrwhitt's role in the revival of transnational networks of scholars and practitioners concerned with a humanistic, ecological approach to urban and regional planning and design following World War Two, notably those connecting East and West. The book details Tyrwhitt's role in creating new programs for planning education in England, North America and Asia; pioneering methods for registered, overlay mapping (a forerunner of GIS), shaping post-war CIAM discourse on humanistic urbanism and assisting CIAM president Jose Luis Sert establish a new professional field of urban design based on this discourse at Harvard University (1956-69); consulting to the United Nations; collaborating with Sigfried Giedion on all of his major publications in English from 1947 on; and helping Constantinos Doxiadis promote a holistic approach to the study of human settlements, which he termed Ekistics, as a founding editor of the journal Ekistics and in the ten Delos Symposia Doxiadis hosted (1963-1972). The book concludes with an a

"During the century 1850-1950 Vancouver Island attracted Imperial officers and other Imperials from India, the British Isles, and elsewhere in the Empire. Victoria was the main British port on the north-west Pacific Coast for forty years before the city of

Vancouver was founded in 1886 to be the coastal terminus of the Canadian Pacific Railway. These two coastal cities were historically and geographically different. The Island joined Canada in 1871 and thirty-five years later the Royal Navy withdrew from Esquimalt, but Island communities did not lose their Imperial character until the 1950s."--P. [4] of cover.

In the aftermath of World War II, twelve million German expellees lost their homes in Central and Eastern Europe. The overwhelming majority came to occupied Germany. However, expellees found themselves also stranded in Western Europe, Africa and the Americas, which is often overlooked by researchers and the public. Going beyond the standard narratives of flight, vigilante evictions and transfers, this book follows expellees in West Germany and Canada and shows, for example, how German prisoners-of-war, exiles or immigrants experienced the expulsions in distant Canada. As the author illustrates making extensive use of oral histories, their experiences were an integral part of the multi-faceted expellee story even though they were physically absent from their homes. Juxtaposing the record of two countries with disparate public discourses on immigration, the author also reveals how in both countries expellees eventually adopted national identities which, based on their ethno-regional heritage, reflected their experience of extreme nationalism, war and expulsion as well as the initially difficult settlement into a new political, social and cultural environment.

This book provides a comprehensive and interdisciplinary exploration of civility and

Read Book Horizons Canada Moves West Chapter 2

political culture in the Muslim world. The contributions consider the changing interface between religion and politics throughout Islamic history, and into the present. Extending beyond saturated approaches of 'political' and/or 'militant' Islam, this collection captures the complex sociopolitical character of Islam, and identifies tensions between the political-secular and the sacred-religious in contemporary Muslim life. The alternative conceptual framework to traditional analyses of secularisation and civility presented across this volume will be of interest to students and scholars across Islamic studies, religious studies, sociology and political science, civilisation studies, and cultural studies.

The Prairie Provinces cover Alberta, Saskatchewan and Manitoba.

In a book that Naomi Klein says could change the world, Anthony Hall shows that the globalization debate actually began in 1492.

"Outer Continental Shelf Environmental Assessment Program"--Cover.

The first major study of the migration of French Canadians to Michigan during the nineteenth century and their substantial impact on the state's development.

The diverse peoples, landscapes, and histories of Western North America come alive with these autobiographical excerpts, author profiles, and activities.

Focusing on the childhood and young adult experience of 10 of the West's most intriguing writers, each chapter presents engrossing personal narrative,

Read Book Horizons Canada Moves West Chapter 2

biographical sketches, a resource bibliography, and numerous learning activities. A bonus section features 20 other Western writers for further exploration. Part One of this strongly worded, informed, and wide-ranging collection examines key issues for the future of Canadian criticism. Part Two offers new readings of important works by Grove, Wilson, MacLennan, Davies, Laurence, Hood, Wiebe, Hodgins, and Atwood. As W.J. Keith argues, 'We still have a mission: to have our literature recognized as an essential reflection of our national life. This is what I mean by retrenchment and consolidation. Literature can survive without literary criticism but it cannot survive if it is unknown and unread. It is criticism's prime function at the present time to see that it is both known and read with that mature enjoyment which is a combination of emotional sensitivity and humane intelligence. As critics, scholars, editors, we shall not be fulfilling our responsibilities or justifying our existence if we attempt anything less.' Or as Keith modestly observes in his introduction to this collection, 'If this book is of any interest, it will be because Canadian literature is an important subject. Literary commentators like myself are middle-men, and should be prepared to admit the fact. If this book succeeds in helping readers to appreciate the works of Canadian writers that I discuss, and to derive increased pleasure and insight from them, it will have served its purpose. I can see no other justification for it -- or for any

Read Book Horizons Canada Moves West Chapter 2

other work of criticism.'

A multidisciplinary consideration of how effective environmental citizenship can be in achieving sustainability, with theoretical, practical, and ethnographic perspectives.

Explores some steps toward non-assimilative encounters in the "global village." Drawing on postcolonial theory this text offers a critique of international management. It argues that such disciplines are Western discourses and exhibit historical and current resonances with the vicissitudes of the so called 'colonial project'. The book explores alternative approaches to the question of the 'other' in late global capitalism.

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

Peter Pond, a fur trader, explorer, and amateur mapmaker, spent his life ranging much farther afield than Milford, Connecticut, where he was born and died (1740–1807). He traded around the Great Lakes, on the Mississippi and the Minnesota Rivers, and in the Canadian Northwest and is also well known as a partner in Montreal's North West Company and as mentor to Alexander

Read Book Horizons Canada Moves West Chapter 2

Mackenzie, who journeyed down the Mackenzie River to the Arctic Sea. Knowing eighteenth-century North America on a scale that few others did, Pond drew some of the earliest maps of western Canada. In this meticulous biography, David Chapin presents Pond's life as part of a generation of traders who came of age between the Seven Years' War and the American Revolution. Pond's encounters with a plethora of distinct Native cultures over the course of his career shaped his life and defined his reputation. Whereas previous studies have caricatured Pond as quarrelsome and explosive, Chapin presents him as an intellectually curious, proud, talented, and ambitious man, living in a world that could often be quite violent. Chapin draws together a wide range of sources and information in presenting a deeper, more multidimensional portrait and understanding of Pond than hitherto has been available.
