Edited by world renown experts with contributions by a global cohort of authors, Auditory-Verbal Therapy: Science, Research, and Practice is highly relevant to today's community of practitioners of Auditory-Verbal Therapy (LSLS Cert. AVT), and to those who are working towards LSLS Cert. AVT certification. It is also an excellent resource for audiologists, speech-language pathologists, teachers of children who are deaf or hard of hearing, administrators, psychologists, cochlear implant surgeons, primary care physicians, social workers, and other allied health and education professionals. Although written primarily for practitioners, it will be a welcome resource for parents, family members, and other caregivers who love children who are deaf or hard of hearing, and for whom the desired outcomes are listening, spoken language, and literacy. The book is divided into five parts: Part I: Overview of Auditory-Verbal Therapy: Foundations and Fundamentals This section covers the philosophy, history, and principles of AVT, including outcome data, results of a new survey of LSLS Cert. AVT community on global practice patterns in AVT, information on auditory brain development, and evaluation of evidence-based and evidence-informed practice for the new decade. Part II: Audiology, Hearing Technologies, and Speech Acoustics, and Auditory-Verbal Therapy This section covers audiology and AVT, hearing aids, implantable and hearing assistive devices, and in-depth speech acoustics for AVT. Part III: Developmental Domains in Auditory-Verbal Therapy This

section covers the development of listening, three-dimensional conversations, speech, play, cognition, and literacy, as applied to AVT. Part IV: The Practice of Auditory-Verbal Therapy Here strategies for developing listening, talking, and thinking in AVT are covered, including parent coaching, the AVT Session: planning, delivery and evaluation, music and singing, assessment, and inclusion of "AVT children" in the regular preschool. Part V: Extending and Expanding the Practice of Auditory-Verbal Therapy The final section includes information on children with complex hearing issues, children with additional challenges, multilingualism, children and families experiencing adversity, telepractice, coaching and mentoring practitioners, and cost-benefit of AVT.

Your telephone is precious. It may be envied. We recommend vigilance when using it in public. --Paris bus public notice

In fall 2014 Lauren Elkin began keeping a diary of her bus commutes in the Notes app on her iPhone 5c, writing down the interesting things and people she saw in a Perecquian homage to Bus Lines 91 and 92, which she took from her apartment in the 5th Arrondissement to her teaching job in the 7th. Reading the notice, she decided to be vigilant when using her phone: she would carry out a public transport vigil, using it to take in the world around her and notice all the things she would miss if she continued using it the way she had been, the way everyone does--to surf the web, check social media, maintain her daily sense of self through digital interaction. Her goal became to observe the world through the screen of her phone, rather than using her phone to distract from the world. During the course of that academic year, the Charlie Hebdo attacks occurred and Elkin had an ectopic pregnancy, requiring emergency surgery. At that point, her diary of dailiness became a study of the counterpoint between the everyday and the Event, mediated through early twenty-first century technology, and observed from the height of a bus seat. No. 91/92 is a love letter to Paris, and a meditation on how it has changed in the two decades the author has lived there, evolving from the twentieth century into the twenty-first, from
