Imaginative play and story telling occupy key roles in children's psychological development and socialization. Bringing together leading contributors, this volume explores what play and story mean to young children, and how these vital aspects of development can best be supported in child care and educational settings. Vital connections are drawn between children's activities, their interpersonal relationships, and their emerging cognitive and affective capacities. Topics covered include promoting social play in the classroom, storytelling and literacy development, and the influences of early caregiving experiences on attachment and learning. Theoretical and methodological issues in these areas of research are also addressed, as well as social policy implications. The book is inspired by the work of Greta G. Fein, the pioneering teacher, researcher, and child care policymaker, who has contributed an integrative concluding chapter. The roots of much American music lie in the intensely personal art form of the blues. What bluesmen from W.C. Handy to B.B. King have told us about their lives has shaped America's perception of the blues. These life stories provide central insights into blues music and stand as a fascinating form of narrative in their own right. Barry

This book examines the relationships between virtual and non-virtual identity in visual role-playing games. In this riveting new novel, the Australian Minister of Defence goes missing when her helicopter crashes in the Australian Outback. Meanwhile, the perpetrators of a terrorist attack on Surfers Paradise, Australia's beach playground, have survived their attack and are being illegally detained nearby at an outback base for interrogation. Foreign agents arrive in the area and attempt to free the terrorists. Will the minister become a hostage for their release? Security forces believe the answer might come from Saxony Knight, a citizen infiltrator of the Paradise attack, but she's disappeared from surveillance. An attack on the base sets off a manhunt across the outback, but who are they hunting and why? The only connection appears to be Saxony Knight. *Outback for Novices: A Saxony Knight Thriller* is the sequel to *Paradise for Beginners*. A review of the first book by Julie Thompson reads: "From the tongue-in-cheek title to the expertly constructed plot, there is nothing of a beginner about this book, a first for the author. It is a gripping ride, swim, climb, run, and dive through a complex story of Middle Eastern family revenge, espionage, surveillance, and flawed processes and people, played out on one of the world's most glamorous yet seedy playgrounds. The narrative is time lapsing, intricately detailed, and written in mostly dialogue, which demands careful and concentrated attention. It begins with the beautiful but damaged Saxony Knight, who boards a luxury cruiser on the Tweed River and is taken hostage by two young Middle Eastern brothers. Australian National Security have placed Saxony there to foil the plot, but can she? It's a frightening, plausible tale."

And yet, for those who are true friends

Those first three volumes were overwhelmingly received, and there were soon calls for additional collections. Since then, their popularity has only continued to grow. And now we present a new three-volume set. Like 2017's two-volumes set, Eliminate the Impossible, this new collection, Whatever Remains . . . Must Be the Truth features tales of Holmes's encounters with seemingly impossible events – ghosts and hauntings, cults and curses, mythical beasts and mediums, angels and demons, and more. In "The Sussex Vampire", Holmes tells Watson: "This agency stands flat-footed upon the ground, and there it must remain.

The world is big enough for us. No ghosts need apply.” In each of the stories presented in this huge three-volume collection, Holmes approaches the varied problems with one of his favorite maxims firmly in place: “. . . . When you have eliminated the impossible whatever remains, however improbable, must be the truth” But what, exactly, is the truth? A Study in Scarlet, the first recorded adventure of Sherlock Holmes and Dr. John H. Watson, was first published in 1887. What an amazing journey the years since then have been! In addition to the pitifully few sixty tales originally presented in The Canon, published between 1887 and 1927, there have been literally thousands of additional Holmes adventures in the form of books, short stories, radio and television episodes, movies, manuscripts, comics, and fan fiction. And yet, for those who are true friends and admirers of the Master Detective of Baker Street, where it is always 1895 (or a few decades on either side of that!) these stories are not enough. Give us more! The forty-nine stories in these three companion volumes represent some of the finest new Holmesian storytelling to be found, and honor the man described by Watson as “the best and wisest . . . whom I have ever known.” All royalties from this collection are being donated by the writers for the benefit of the preservation of Undershaw, one of the former homes of Sir Arthur Conan Doyle. Part XVII – Whatever Remains Must Be the Truth (1891-1898) features contributions by: Charles Veley & Anna Elliott, Arthur Hall, Michael Mallory, Will Murray, Paul D. Gilbert, S. Subramanian, Roger Riccard, Stephen Herczeg, Hugh Ashton, Chris Chan, Bert Coules, Jane Rubino, Tracy J. Exploring the ethical questions posed by, in, and about children’s literature, this collection examines the way texts intended for children raise questions of value, depict the moral development of their characters, and call into attention shared moral presuppositions. The essays in Part I look at various past attempts at conveying moral messages to children and interrogate their underlying assumptions. What visions of childhood were conveyed by explicit attempts to cultivate specific virtues in children? What unstated cultural assumptions were expressed by growing resistance to didacticism? How should we prepare children to respond to racism in their books and in their society? Part II takes up the ethical orientations of various classic and contemporary texts, including 'prosaic ethics' in the Hundred Acre Wood, moral discernment in Narnia, ethical recognition in the distant worlds traversed by L’Engle, and virtuous transgression in recent Anglo-American children’s literature and in the emerging children’s literature of 1960s Taiwan. Part III’s essays engage in ethical criticism of arguably problematic messages about our relationship to nonhuman animals, about war, and about prejudice. The final section considers how we respond to children’s literature with ethically focused essays exploring a range of ways in which child readers and adult authorities react to children’s literature. Even as children’s literature has evolved in opposition to its origins in didactic Sunday school tracts and moralizing fables, authors, parents, librarians, and scholars remain sensitive to the values conveyed to children through the texts they choose to share with them.

to expand the experiment while the Pentagon tries to obtain control over the experiment as a defense project. One of their observers, an officious naval captain, interferes with the experiment and causes the experiment to blow up, sending a portion of the University back in time. Efforts to return only puts the group further into the past and the people and a portion of the university winds up in the year 1003 A.D. One of the primary problems facing the colony is the need for more people and children so the colony will not die out and the knowledge lost. Since women far outnumber men, much debate occurs as to how they can have more children when there are not enough males. This is solved by a sharing arrangement where a woman asks permission of a wife to share her husband for purposes of insemination, after which the man must have nothing more to do with the woman. This arrangement makes many women unhappy and requires modification. The colony meets the Cahokian Indians and establish a common ground of support for each other when the colonists defeat a warring Indian tribe who attack the Cahokians. Further complications arise when the Indians desire to become "one people" which requires the council members to take an Indian "princess" and some women to marry an Indian "prince." This is done to make "One People" and thus seal the pact. The people struggle to survive; scrounging seeds, food and clothing from various sources and changing cars and trucks into fanning and mining equipment. By the end of the second year the colony is in good enough shape to search for and find oil, gold, coal and iron ore. The third year they are able to send the destroyer to Europe for supplies and more people and children. The book details the efforts for the colony to survive and grow and to reshape the direction of the world by having as their primary goal education of the people. The conditions of the various countries and the living conditions in the world in 1005 A.D. are described and the history of many of the plants and foods used by Americans today.
