Medical Surgical Virtual Clinical Excursion Answer Key

Virtual clinical excursions--medical-surgical [is] a virtual hospital setting in which you can work with multiple complex patient simulations and also learn to access and evaluate the information resources that are essential for high-quality patient care. The virtual hospital, Pacific View Regional Hospital, has realistic architecture and access to patient rooms, a Nurses' Station and a Medication Room.
This money-saving package includes the 9th edition of Medical-Surgical Nursing - Two Volume Text and Virtual Clinical Excursions 3.0.
Part of the popular LPN Threads series, this bestselling text discusses the care of adults and older adults while covering the full range of disorders that require medical, surgical, or psychiatric management. Written specifically for the LPN/LVN student, this text thoroughly explores the role of the LPN/LVN in a variety of care settings, and the new Companion CD takes learning to the next level with an extensive pharmacology tutorial, realistic 3-D A&P animations, and a Dorland's audio glossary.
Accompanying CD-ROM contains ... "case studies including 40 patient cases, disorder overviews, and interactive activities; glossary of terms and definitions organized alphabetically and by chapter; patient and family instruction guides in English and Spanish for printing and distributing to patients."--Page 4 of cover.
This money saving package includes the 8th edition of Medical-Surgical Nursing - Single Volume Textbook and Virtual Clinical Excursions 3.0.
Virtual Clinical Excursions (Phase 2) is a workbook/CD-ROM package that guides the student through a multi-floor virtual hospital in a hands-on learning experience. The student is actively engaged with the workbook, CD-ROM and parent text throughout each lesson. Each lesson has a core textbook reading assignment and activities based on "visiting" the patients in the hospital. The lessons in the workbook complement the content in the textbook and provide a perfect environment in which students may "practice" what they are learning in the text. The multi-floor virtual hospital also has built-in testing of clinical knowledge with NCLEX type questions. As the student "visits" each patient, they are able to access realistic information resources essential for patient care. Information resources include: charts, medical administration records, electronic patient records, video streaming of patient dialogue with nurses and other related materials. These resources provide an opportunity for the student to assess and analyze information, make a diagnosis, set priorities and implement and evaluate care. Includes a guided tutorial which shows students how to work with a patient in the virtual hospital · collect patient data from various sources (reports, charts, medication administration record, short video clips and audio clips of nurse-patient interactions) · record patient data · listen to a report and itemize a patient's problems and high-priority concerns · and sometimes administer medications. Requires students to use their critical thinking skills to set priorities for care, collect data, analyze and interpret data, and reach conclusions about complex problems within a health-illness transition. Encourages active learning and provides opportunities to identify information to collect and process data for

evidence-based patient care; work with data entry and retrieval screens; optimize use of available information resources; understand hospital information systems; manage information for decision-making; and maintain and improve core computing skills. Produced in conjunction with the Virtual Clinical Excursions CD-ROM authors: Jay Shiro Tashiro, PhD, RN, Director of Systems Design, Wolfsong Informatics, Tucson, Arizona; Ellen Sullins, PhD, Director of Research, Wolfsong Informatics, Tucson, Arizona; Gina Long, RN, DNSc, Assistant Professor, Department of Nursing, College of Health Professions, Northern Arizona University, Flagstaff, Arizona Virtual Clinical Excursions is a hybrid CD so it runs on both Macintosh and Windows platforms.

This convenient, money-saving package is a must-have for students training for a career in nursing. It includes the Monahan: Medical-Surgical Nursing 8th edition text and Virtual Clinical Excursions 3.0.

Virtual Clinical Excursions is an innovative CD-ROM/workbook package that makes textbook content come alive and diminishes your anxiety about entering the clinical setting. VCE helps bridge the gap between the classroom and the real world by introducing you to clinical settings and critical thinking before you actually start clinical rotations - making the transition from nursing student to caregiver a smoother process. In this virtual hospital setting, you will interact with a variety of patients and gain valuable experience with documentation, communication, prioritization, medication safety, critical thinking, patient education, and care planning. Real-world nursing scenarios challenge you to set priorities for care, collect data, analyze and interpret data, and reach conclusions about complex problems within a health-illness transition. The highly engaging format encourages active learning and provides opportunities to collect and process data for evidence-based patient care; work with data entry and retrieval screens; access available information resources; understand hospital information systems; manage information for decision-making; and maintain and improve your core computing skills. Includes over 250 NCLEX® examination-style questions based on the VCE patients. Augments knowledge of physical assessment by allowing you to examine and document vital signs, as well as assess information related to the head and neck, chest, back and spine, upper extremities, abdomen, pelvic, and lower extremities. The software allows you to access realistic information essential for patient care, including: charts, medical administration records, electronic patient records, video clips of nurse-client interactions, and other related materials. The realistic environment gives you the opportunity to monitor and care for one or more patients during three 45-minute periods of care within a 12-hour shift. Clinical Alerts highlight changes in the patient's condition. New flash-based technology is easier to use and offers seamless navigation. You can leave the software program at any time and return later to pick up where you left off without losing any information. Six unique new patients/cases feature new patient data in the Electronic Patient Record, Patient Charts, KARDEX, and Medication Administration Record. The workbook includes

time icons that indicate how long it will take to complete a particular exercise. Icons for linked activities alert you when a particular workbook exercise is linked to another exercise and cannot be completed independently. A new Medication Room introduces you to a wide variety of drug storage areas, such as a Unit Dosage Cabinet, Automated Dispensing System, IV Storage, and a Refrigerator. A medication administration feature enables you to select, prepare, and administer medications. Over 50 common medication errors embedded within the software challenge you to think critically about safe medication practices and follow safe medication standards. A Medication Scorecard provides instant feedback on what medications you administered correctly and which medications you administered incorrectly. The Examination Report checklist tracks your performance on Baseline and Focused assessments.

This money-saving package includes the 2nd editon of Medical Surgical Nursing Textbook and Virtual Clinical Excursions 3.0 for Medical-Surgical Nursing.

This convenient, money-saving package is a must-have for students training for a career in nursing. It includes Medical-Surgical Nursing Single Volume Text and Virtual Clinical Excursions 3.0 Package: Clinical Management for Positive Outcomes, 7e. This convenient, money-saving package is a must-have for students training for a career in nursing. It includes Lewis' Medical-Surgical Nursing Two Volume Textbook set, 6th edition and Virtual Clinical Excursions 3.0 for Lewis' Medical-Surgical Nursing, 6th edtion.

This convenient, money-saving package is a must-have for nursing students! It includes DeWit's Medical Surgical Nursing, 1st edition text, DeWit's Student Learning Guide for Medical Surgical Nursing, and Virtual Clinical Excursions.

Never HIGHLIGHT a Book Again Includes all testable terms, concepts, persons, places, and events. Cram101 Just the FACTS101 studyguides gives all of the outlines, highlights, and quizzes for your textbook with optional online comprehensive practice tests. Only Cram101 is Textbook Specific. Accompanies: 9780872893795. This item is printed on demand.

One of the most complete nursing education learning systems available, Virtual Clinical Excursions is an online program that guides you through a virtual hospital where the patients are real and their conditions are constantly changing. By immersing students in a realistic, yet safe, nursing environment, VCE simulates the average clinical rotation by allowing users to conduct a complete assessment of a patient and set priorities for care, collect information, analyze and interpret data, prepare and administer medications, and reach conclusions about complex problems. Each lesson has a textbook reading assignment and activities based on "visiting" the patients in the hospital - providing a perfect environment to "practice" what you are learning. Online workbook includes a set of lessons to prepare and guide you through a variety of patient scenarios, which are all connected to your textbook. Physical examination interactions include unique images and assessment findings for each patient scenario. Patient chart provides quick access to vital information such as physician's orders, laboratory reports, patient education, nursing admission, and more, offering a richly detailed portrait of the patient. Electronic patient record houses data from the patient's entire hospital stay and offers the ability to record new data findings. Nurse-client interaction videos depict conversations and situations involving nurses, patients, family members, and hospital staff to help you discern between communications that are ideal and those that need improvement. Updated drug reference includes a comprehensive set of the latest drug monographs to help you make the

best clinical judgments involving medication administration. NEW! Online format enables you to access Virtual Clinical Excursions from any PC or MAC with an internet connection. NEW! Laboratory guide provides standard value ranges for all laboratory values offered within the virtual patient hospital, so you can confirm and compare standard lab values against your patients' test results.

This money-saving package includes the 9th edition of Medical-Surgical Nursing - Single Volume Text and Virtual Clinical Excursions Online.

This convenient, money-saving package is a must-have for students training for a career in nursing. It includes Lewis' Medical-Surgical Nursing Two Volume Textbook set, 7th edition and Virtual Clinical Excursions 3.0 for Lewis' Medical-Surgical Nursing, 7th edtion.

This money-saving package includes the 7th edition of Adult Health Nursing - Text and Virtual Clinical Excursions Online.

Package includes Medical-Surgical Nursing: Assessment and Management of Clinical Problems Single Volume text & Virtual Clinical Excursions 2.0

This money saving package includes Lewis's 7th edition Medical-Surgical Nursing - Single Volume Textbook, Virtual Clinical Excursions, and FREE Study Guide.

Virtual Clinical Excursions Pacific View Regional Hospital is a groundbreaking workbook/CD-ROM package that brings learning to life in a "virtual" hospital setting. This guided learning experience features textbook reading assignments that correspond with the CD-ROM and workbook activities. The workbook acts as a map, guiding students through the virtual hospital as they care for patients in the virtual hospital to help students make connections between what they experience through the CD-ROM and what they've learned in their textbook. Each virtual hospital visit allows the student to access realistic information resources essential to patient care resulting in a true-to-life, hands-on learning experience. Real-world problems place users in nursing scenarios where they can set priorities for care, collect data, analyze and interpret data, and reach conclusions about complex problems within a health-illness transition. The highly-engaging format encourages active learning and provides opportunities to identify information to collect and process data for evidence-based patient care; work with data entry and retrieval screens; optimize use of available information resources; understand hospital information systems; manage information for decision-making; and maintain and improve core computing skills. Lessons in the workbook complement the content in the textbook and guide the student through the virtual hospital. Includes over 250 NCLEX-RN examination-style questions based on the VCE patients that offer built-in testing of clinical knowledge. The virtual hospital gives students the opportunity to monitor and care for six unique patients/cases, each of whom has complex medical-surgical conditions. The online testing program includes more than 250 NCLEX-style questions for each patient, allowing instructors to assess and measure students' understanding and clinical judgment for each case. Each workbook activity includes time icons showing how long it should take the average student to complete the exercise and linkage icons to indicate that a previous activity must be completed before attempting the one at hand. Augments knowledge of physical assessment by allowing the student to examine and document vital signs, as well as assess information related to the head and neck, chest, back and spine, upper extremities, abdomen, pelvic, and lower extremities. The CD-ROM offers users the opportunity to visit each patient and access realistic information essential for patient

care, including: charts, medical administration records, electronic patient records, video clips of nurse-client interactions, and other related materials. Offers students the opportunity to monitor and care for one or more patients during three 45-minute periods of care within a 12-hour shift. Clinical Alerts highlight changes in the patient's condition within these 45-minute periods. A Time Icon appears under each lesson, indicating how much time it will take the student to complete the activity. Includes 6 unique new patients/cases, each with complex conditions for students to care for and monitor within the virtual hospital. A new Medication Room that introduces students to a wide variety of drug storage areas, such as a Unit Dosage Cabinet, Automated Dispensing System, IV Storage, and a Refrigerator. A medication administration feature enables users to select, prepare, and administer medications, reinforcing the precepts of safe medication in a harm-free environment. Over 50 common medication errors imbedded within the software to boost clinical realism and prepare students for current practice. Greater faculty support with the addition of the Fac Pac, a new instructors' website, and a radically expanded testing component. A drug guide provides complete drug monographs for all medications used within the program.

Guiding students through a virtual clinical experience, VCE: Red Rock Canyon Medical Center is a teaching hospital that is modeled after a real medical-surgical floor. It contains five patient rooms, a nurses' station, a supervisor's office, two conference rooms, a nurses' lounge, and a waiting room with an elevator. The following patients are seeking treatment in Red Rock Canyon Medical Center: Carmen Gonzalez: This older Hispanic female presents with an infected leg that has become gangrenous. She has Type 2 diabetes mellitus, as well as complications of congestive heart failure and osteomyelitis David Ruskin: Following a car-bicycle accident, this young adult African-American male is admitted with a possible closed head injury and a badly fractured right humerus. He undergoes an open reduction and internal fixations of the right humerus. Sally Begay: This Native American woman enters the hospital and is initially suspected of having a Hanta virus infection. She has a confirmed diagnosis of bacterial lung infection. This client's complications include chronic obstructive pulmonary disease and inactive tuberculosis. Ira Bradley: Ira is a caucasian adult male with late-stage HIV disease who is admitted for an opportunistic respiratory infection. He has complications of oral fungal infection, malnutrition, and wasting. Andrea Wang: This young Asian female entered the hospital after a diving accident in which T6 is crushed, with partial transection of the spinal cord. After a week in the ICU, she has been transferred to the medical-surgical unit, where she is being closely monitored. Includes a guided tutorial which shows students how to work with a patient in the virtual hospital · collect patient data from various sources (reports, charts, medication administration record, short video clips and audio clips of nurse-patient interactions) · record patient data · listen to a report and itemize a patient's problems and high-priority concerns · and sometimes administer medications. Requires students to use their critical thinking skills to set priorities for care, collect data, analyze and interpret data, and reach conclusions about complex problems within a health-illness transition. Encourages active learning and provides opportunities to identify information to collect and process data for evidence-based patient care; work with data entry and retrieval screens; optimize use of available information resources; understand hospital information systems; manage information for decision-making; and maintain and improve core computing skills.. A series of

groundbreaking, new workbooks and CD-ROMs, Virtual Clinical Excursions bring learning to life in two different "virtual" hospital settings! Each lesson in Virtual Clinical Excursions has a core textbook reading assignment with corresponding CD-ROM and workbook activities. The exercises in the workbook complement the content in the the the parent text and provide a perfect environment in which students may "practice" what they are learning in the text. The workbooks act as maps - guiding students through the CD-ROM as they care for patients in the virtual hospital. Virtual hospital visits on the CD-ROM allow students to access realistic information resources that are essential to patient care.

One of the most complete nursing education learning systems available, Virtual Clinical Excursions is an online program that guides you through a virtual hospital where the patients are real and their conditions are constantly changing. By immersing students in a realistic, yet safe, nursing environment, VCE simulates the average clinical rotation by allowing users to conduct a complete assessment of a patient and set priorities for care, collect information, analyze and interpret data, prepare and administer medications, and reach conclusions about complex problems. Each lesson has a textbook reading assignment and activities based on "visiting" the patients in the hospital - providing a perfect environment to "practice" what you are learning.
