

My Two Homes My Family

Raised with twelve brothers in a part of the segregated South that provided no school for African American children through the 1940s, Sylvia Bell White went North as a teenager, dreaming of a nursing career and a freedom defined in part by wartime rhetoric about American ideals. In Milwaukee she and her brothers persevered through racial rebuffs and discrimination to find work. Barred by both her gender and color from employment in the city's factories, Sylvia scrubbed floors, worked as a nurse's aide, and took adult education courses. When a Milwaukee police officer killed her younger brother Daniel Bell in 1958, the Bell family suspected a racial murder but could do nothing to prove it—until twenty years later, when one of the two officers involved in the incident unexpectedly came forward. Daniel's siblings filed a civil rights lawsuit against the city and ultimately won that four-year legal battle. Sylvia was the driving force behind their quest for justice. Telling her whole life story in these pages, Sylvia emerges as a buoyant spirit, a sparkling narrator, and, above all, a powerful witness to racial injustice. Jody LePage's chapter introductions frame the narrative in a historical span that reaches from Sylvia's own enslaved grandparents to the nation's first African American president. Giving depth to that wide sweep, this oral history brings us into the presence of an extraordinary individual. Rarely does such a voice receive a hearing. According to biblical doctrine, God first created people in the universe with a hierarchy of holy angels, with the highest order being identified as "cherubim." One of them, who was anointed and perhaps the most elitist cherub amongst them, knew he was created beautiful and perfect

in his ways. Alternately, with pride and arrogance at the forefront, that same being became the supreme architect and advocate for sin, evil and untold suffering. Henceforth, the diabolical Satan was loosed upon the world. Tragically, from time to time, beauty is in the fabled beast. Handsome man and beautiful women may be pleasing to the eyes and their good looks may even grant them unearned favor but their inner nature is a virtual mystery. They might be evil incarnated. Meanwhile, the not-so attractive individuals are oftentimes ignored and generally devalued, all dependent upon the beholder. But possibly, the inner core of that select person could render him or her almost angelic-like. Life's long and winding road is lined with so-called beautiful and so-called unattractive people. However, through faith and God's grace (and not the naked eye), the lonely traveler may be able to distinguish which is which. And that'll make life's journey worthwhile. All too often, a young man fathers a child and assumes that that, in itself, validates his manhood. Initially, as a new dad, he might even feel that all is right with the new world, and his future looms bright. In many cases, it's a heartfelt euphoria that defies description. However, when the novelty wears off and reality returns, a rather lengthy journey commences. To the mother's credit and merit, she usually accompanies her offspring on life's long and winding road but, far too frequently, the once proud father falters or completely vanishes along the way. Arguably so, it's serious and impactful tragedy for the mother, the absentee father, the child and sometimes, the world at large. The good news is this, however, "One-size-fits-all" meager, gloomy or dire it might be, does not necessarily dictate their impending future. Through their own resilience, paired with a burning desire to overcome their childhood's deficiencies, they, alternately, walk a pathway less hazardous. And sometimes, when sincere loved ones step forward, it renders life's journey well worthwhile and almost

Dana's in prison for a murder she didn't commit—and Heidi's determined to find out who did, determined to see Dana set free. But she has no idea how to go about it. Then, like the answer to a prayer, she meets Gideon Poletti, a San Diego homicide detective, who shows up at the school where Heidi teaches. He's there to give an adult education class in criminology. And he's doing it in her classroom. Not only is Gideon a celebrated detective, he's the most attractive man she's ever met. But she tells herself she doesn't have time for romance—her friend's very life is at stake! She joins Gideon's class to learn two things. Can he help her? And will he? To her relief and gratitude, he says yes to both. Their quest for justice uncovers a shocking truth, one Heidi could never have predicted. Nor could she have predicted that her “private” detective would fall as hard for her as she has for him!

In this autobiography, D. Gordon Rohman, a child of the Thirties, brings to life in loving detail the world of the small town in which he grew up. He begins his story when he was age three with a mysterious kairos moment in which he was awakened to himself by his mothers singing. Ever since, he has cherished the intuition that he has been on a sacred journey, touched by God, and renewed every morning as he awakened to ever larger life. Raised a Baptist, his faith journey led him to seek God in the self when he discovered Emerson and Thoreau in college. In his 50s, he was awakened to a breathtaking cosmic vision of God and Christianity by the works of C. S. Lewis. The author fills his journey with stories of the many families who, he says, made me possible. I built my life on the rock of two families, he writes, the one I was born into and the one my wife Pam and I created in which we raised seven children. But I have been nurtured by many other families of my hometown, of ancestors, of in-laws, of comradeship, of

vocation, of avocation, and of faith. My story, the author writes, runs like a two-way street filled with the traffic of active and passive verbs giving and being given, serving and being served, helping and being helped, teaching and being taught, loving and being loved. Readers of this heartfelt and insightful autobiography will discover one man's road to Heaven filled with love of ideas, friends, work, soul mates, stories, families and God.

What is important is the circles of influence that have helped me to become who I am today. God has used each splash to divinely order every step to ripple through every part of my life, ministry, and story. I pray to continually make splashes with those impacts from here to the uttermost parts of the earth, by living out each lesson learned. Never forget that regardless of the size of the splash, each one of them continues to ripple across the ocean of life. ? Crystal Reece, Author ? Her story is our story. It's the life of contrasts the writer of Ecclesiastes told us about. Sadness and joy, tears and victory, grief and dancing, crawling and flying ? it's all there. But, unlike so many, the fragile segments of Crystal's life are held together by the God-thread of unwavering trust. It is this very thread that reaches out and weaves you into the amazing tale of a life of selfless devotion to the God of the universe. More than a memoir, this is a story that can become yours if you let it. ? Melani Shock, Pentecostals of Alexandria, and author of Eat This Book ? If you expect this book to be about a young woman's call to do missions work, it is. Do you perceive it to be about prayer? You are correct. Do you view this as a how-to book on finding God's will and experiencing His provision? Right again; it's all this and more! This book illustrates how God strategically places influencers in our lives to ?splash? us, as Crystal so ably states, causing ripple effects. As you read, may your heart be stirred, causing you to splash others with the all-encompassing love of Jesus Christ! ? David

I was born during the winter of 1944 by an unwed, seventeen year old, frightened Norwegian girl on the war-torn soil of Germany. Unknowingly, she became part of Heinrich Himmler's plan, known as the Lebensborn Program, a master design for cultivating an Aryan race. The unfolding story is both revealing and touching. Over time slivers of buried history surfaced into the mainstream of my thinking. An orphan's journey is revealed transforming the story into enlightened self-discovery. It wasn't until I found the courage to face the unknown mysteries woven together by people, places and programs that healing could eventually take place. All the intertwining circumstances influenced my life, opened my eyes and helped me make peace with my inner spirit.

This story tells of rape, molestation, inhumane punishment, brutal acts of inconceivable horror, and unbearable torment. What makes it even more horrific is that these vicious, insane crimes were all committed by the hands of their own biological father. You will cry as you hear their stories. You will sit in awe as you read page after page of an evil man whose character and nature can only be described as that of Satan himself. How could this happen? How could cruelty go unnoticed, when the children, as they tell their story, had to go to school, with their blouses sticking to them because of the blood that would seep through the open wounds and welts all over their innocent little bodies? Where are they now? What is life like for them now?

Even as the Holocaust grows more distant with the passing of time, its traumas call out to be known and understood. What is remembered, what has been imparted through German heritage, and what has been forgotten? Can familiar family stories be transformed into an understanding of the Holocaust's forbidding reality? Author Roger Frie is uniquely positioned to answer these questions. As the son of Germans who were children during World War II, and with grandparents who were participants in the War, he uses the history of his family as a guide to explore the psychological and moral implications of memory against the backdrop of one of humanity's darkest periods. From his perspective of a life lived across German and Jewish contexts, Frie explores what it means to discover the legacy of a Nazi past. Beginning

surprisingly close: at home, with our family and friends. We can apply the practice of family activism to foster what he calls familia—warm, loving connections with our relatives and with those we choose to call family—and develop the skills and attitudes we need to tackle broader problems in our community, our nation, and the world. In *Family Activism*, Vargas draws from his own life to show how to apply tools such as copowering communication, family councils, and unity circles to create family and community cultures that empower all of us to become more committed and skillful agents of positive change.

For American children raised exclusively in wartime—that is, a Cold War containing monolithic communism turned hot in the jungles of Southeast Asia—and the first to grow up with televised combat, Vietnam was predominately a mediated experience. Walter Cronkite was the voice of the conflict, and grim, nightly statistics the most recognizable feature. But as involvement grew, Vietnam affected numerous changes in child life, comparable to the childhood impact of previous conflicts—chiefly the Civil War and World War II—whose intensity and duration also dominated American culture. In this protracted struggle that took on the look of permanence from a child’s perspective, adult lives were increasingly militarized, leaving few preadolescents totally insulated. Over the years 1965 to 1973, the vast majority of American children integrated at least some elements of the war into their own routines. Parents, in turn, shaped their children’s perspectives on Vietnam, while the more politicized mothers and fathers exposed them to the bitter polarization the war engendered. The fighting only became truly real

insomuch as service in Vietnam called away older community members or was driven home literally when families shared hardships surrounding separation from cousins, brothers, and fathers. In seeing the Vietnam War through the eyes of preadolescent Americans, Joel P. Rhodes suggests broader developmental implications from being socialized to the political and ethical ambiguity of Vietnam. Youth during World War II retained with clarity into adulthood many of the proscriptive patriotic messages about U.S. rightness, why we fight, heroism, or sacrifice. In contrast, Vietnam tended to breed childhood ambivalence, but not necessarily of the hawk and dove kind. This unique perspective on Vietnam continues to complicate adult notions of militarism and warfare, while generally lowering expectations of American leadership and the presidency.

There aren't too many humans who go through their daily lives aware that there are two worlds here, the human existence and the Demons. Demons are everywhere, some even live amongst humans. There are only two species that are made, Vampire and Lamiahaem, the others, Jorgenhan, Changelings, Sirens, Casanovas, Witches and Warlocks are born or hatched, and they have normal life cycles. Magic plays a big part in our world, there are many humans who find that they can make things happen without being able to explain these happenings, the ones that are strong are generally found and recruited into our world, by the Guard. We had visited with many of these Witches and Warlocks. One family in particular always stood out, the Howard family. Their magic was powerful; nothing had ever measured up to them in all of my years. The matriarch of the family, decided not to join us, she stayed in the human world. Her granddaughters though we would watch from a distance. The Guard are soldiers for the Elders. There are seven Elders, in each sector, and there are three sectors, that keep the

world covered. The reason there are seven is to ensure that all main Demons are represented. It is very rare that they ever get together, it has only happened once in my lifetime and that was in the very beginning when they first came to be. The Elders are our law; they are the ones who stop all unnecessary murders/slaughter being done to humans by our kind. They keep harmony. There is only one punishment, imprisonment followed by death. In our sector the lead Elder is my maker, my father, Elder Thomas Carter, he is a Lamiahaem. Lamiahaem are very passionate Demons, if we were not part of the Guard we would be living peacefully in our large family groups. Our species are not naturally aggressive, we have had to learn to adapt to a violent world. We are made and we make our partners, these are always humans that have magical gifts. When we meet that partner it is for life, this is natural for us. It is hard to explain the magnetic pull that you have when you first meet your mate; this love is also experienced by the human. There is only one mate for you, if that is denied you will recover and eventually meet another, but it can take some time. I have been Lamiahaem since 1554, my name is Simon. My father Thomas Carter lost his mate in a fight with vampire before he made me. He still cannot explain why he felt the need to change me, only to say that he noticed my gift of being able to feel illness and injuries and to know how to heal. Father believed that I would be useful to his world. We were in Newcastle in 1635, I was with the Guard. There were Renegade Vampire feeding off humans that had the plague, it appeared their affected blood was something like a drug to them. Even though these humans were going to die, we were still there to stop them from being slaughtered. That was when I seen the woman who would later become my wife, Julie, she had shoulder length light brown hair and sad brown eyes, the feelings I had were instant. Her eyes haunted me every second from the moment I seen her. It

The book explains how multi-generational Australian-born Chinese (ABC) negotiate the balance of two cultures. It explores both the philosophical and theoretical levels, focusing on deconstructing and re-evaluating the concept of 'Chineseness.' At a social and experiential level, it concentrates on how successive generations of early migrants experience, negotiate and express their Chinese identity. The diasporic literature has taken up the idea of hybrid identity construction largely in relation to first- and second-generation migrants and to the sojourner's sense of roots in a diasporic setting somewhat lost in the debate over Chinese diasporas and identities are the experiences of long-term migrant communities. Their experiences are usually discussed in terms of the melting-pot concepts of assimilation and integration that assume ethnic identification decreases and eventually disappears over successive generations. Based on ethnography, fieldwork and participant observation on multi-generational Australian-born Chinese whose families have resided in Australia from three to six generations, this study reveals a contrasting picture of ethnic identification.

Yellowstone holds a special place in America's heart. As the world's first national park, it is globally recognized as the crown jewel of modern environmental preservation. But the park and its surrounding regions have recently become a lightning rod for environmental conflict, plagued by intense and intractable political struggles among the federal government, National Park Service, environmentalists, industry, local residents, and elected officials. The *Battle for Yellowstone* asks why it is that, with the flood of expert scientific, economic, and legal efforts to resolve disagreements over Yellowstone, there is no improvement? Why do even seemingly minor issues erupt into impassioned disputes? What can Yellowstone teach us about the worsening environmental conflicts worldwide? Justin Farrell argues that the battle for Yellowstone has deep moral, cultural, and spiritual roots that until now have been obscured by the

supposedly rational and technical nature of the conflict. Tracing in unprecedented detail the moral causes and consequences of large-scale social change in the American West, he describes how a "new-west" social order has emerged that has devalued traditional American beliefs about manifest destiny and rugged individualism, and how morality and spirituality have influenced the most polarizing and techno-centric conflicts in Yellowstone's history. This groundbreaking book shows how the unprecedented conflict over Yellowstone is not all about science, law, or economic interests, but more surprisingly, is about cultural upheaval and the construction of new moral and spiritual boundaries in the American West.

If an elephant appears in the morning, all planned activities are put on hold and the villagers join forces to deal with it. For Tshiwa Trudie Amulungu, the elephant showed up on many mornings and she had no choice but to tame it.
