Survey of Accounting, 3rd edition, is designed to cover both financial and managerial accounting in a single 16-week course, presenting the material in a style easy for non-accounting majors to grasp. It incorporates the same pedagogical innovations that have made Edmonds' financial and managerial titles such fast-growing successes in the marketplace, including his unique Horizontal Financial Statements Model and a multiple accounting cycle approach that demonstrates the impact of related events over a series of accounting cycles.

Year after year, this book has immensely helped students in their comprehension of the subject and score good marks in examinations. It has been written specifically for the prescribed syllabus of Cost Accounting Paper of BCom (Hons) Semester IV of the University of Delhi and of School of Open Learning. Its basic features are the same as the mother book Cost Accounting—Principles and Practice, which is a UGC-recommended text for the last many years. Thus, it gives a thorough grounding in cost concepts, cost behaviour, and costing methods. The subject matter has been organized on 'first things first' basis to

sustain the interest of the students. Every discussion involving conceptual difficulties is immediately followed by a numerical example.

In its US edition, Accounting Principles has been a market leading introductory accounting textbook for over 25 years. The Australasian adaptation of this highly regarded textbook accentuates its relevance to both students and academics alike with its constructive pedagogical structure, application of accounting to a wider business environment, and clear, easy-to-understand writing style. As accounting is the language of business, Principles of Financial Accounting, 3rd Edition will teach students the value of accounting information in business and its integral role in business planning and growth. The third edition thoroughly details the steps in the accounting cycle and the accounting process, from recording business transactions through to preparing financial statements, and the reporting requirements under IFRS. Throughout the chapters real company financial information and extracts from annual reports are used to reinforce how accounting information is presented, and the range of business decisions that can be made from accounting information. The text is ideal for a first course in financial accounting and students studying with this textbook will be equipped with the knowledge and skills required to further their accounting studies.
