activities are based on these linked ideas: • Young children need their teachers to help them make sense of the world; • The most effective medium for explaining, discussing, describing with children, is talk; • Children learn very well from one another when taught how to do so, and are a good resource for one another in the classroom; • Children may be able to talk, but they are not often aware what sort of talk can help them to get the best from their education; • Direct teaching of essential talk skills and understanding is straightforward and should be undertaken in school classrooms. The numerous lesson plans included in this book are each built around specific learning objectives for speaking and listening and cover subjects such as literacy, numeracy, science, citizenship, ICT and Computing. Each lesson includes a resources list and photocopiable worksheets and range from whole class to small group work. This book will help you teach children to engage in the educationally effective kind of discussion known as Exploratory Talk, where everyone's viewpoint is considered, opinions are justified with reasons, and decisions are made together. This new edition includes updated curriculum links, new research findings, a home-school link section and contain additional EAL and SEN materials.

As teachers everywhere find more and more students with limited English in their classes, many are asking: "How can I include ELL students in every aspect of the day?" Beginning with designing a classroom that welcomes students and creates appropriate conditions for learning, Emelie Parker and Tess Pardini go on to detail a workshop format for reading, writing and content-area studies. The workshop structure allows teachers to differentiate instruction to include all students, and affords students ample opportunities to collaborate with others as they learn to speak, read, write, and comprehend while also engaging in active learning of the curriculum. The authors provide numerous examples of ways that teachers can become proficient in knowing each child and orchestrating instruction to meet individual needs. Throughout "The Words Came Down!" oral language is emphasized in a continuum from teacher modeling and demonstration to situations in which student-to-

student communication is essential. The authors show that when children's attempts at communicating are accepted and celebrated, they will learn to communicate with each other comfortably and spontaneously whether on the playground or working on a science experiment. In addition, this helpful guide offers a variety of approaches to assessment, and demonstrates the importance of engaging families as partners in learning English and content.

### Individual Big Book

This up to date text addresses primary science teaching in light of the new primary National Curriculum and the latest Teachers' Standards. Aimed at primary trainees and teachers, it provides creative, inspiring and practical ideas and approaches for teaching the full range of science topics. Each chapter is aligned to an area of the new National Curriculum and provides key vocabulary, details of common misconceptions and how to address them, teaching strategies and activities, cross-curricular links and health and safety points. Throughout there is a strong focus on science subject knowledge development and how to translate this into practice in the primary classroom. The book also encourages readers to reflect on their own subject knowledge of science and challenges them to critically evaluate their teaching in order to become more effective.

With the changes that have taken place to the National Curriculum for science, the investigations that children should experience have broadened and become a key part of the curriculum necessary for the development of knowledge and understanding. Working Scientifically is a comprehensive guide that will help primary teachers develop their skills, improve their practice and nurture 'working scientifically' in the classroom. This book provides teachers with the tools and resources that are necessary for teaching science in a fun and exploratory way. Focusing on individual skills, it provides scientific activities in a number of different contexts. It explores each skill multiple times to help pupils progress through the age-related expectations and emphasises teaching through exploration, questioning and dialogue. Using the analogy of a journey to space as the central concept, with each step of progression related to a step in the journey, chapters include: What is 'working scientifically'? Raising questions, predictions and planning; Observations, measurements and recording; Interpreting, analysing and concluding; Reflecting and evaluating; Assessment. Full of practical resources such as planning materials and assessment sheets, Working Scientifically will be an essential guide for all qualified and trainee primary teachers wishing to develop their practice in this essential area of the Science curriculum.
