Get the most out of property investment and secure your financial future 7 Steps to Wealth is the only real estate book in Australia endorsed by three of Australia's property billionaires. It shares John L. Fitzgerald's own 35-year proven property strategy, supported statistically and with real life case studies from readers of earlier editions. Now in its 8th edition the book is completely up-to-date with the latest census data, location criteria and growth forecasts. Most importantly the book exposes the difference between property and real estate, proving that it's only the land that appreciates and that the buildings that sit on the land actually depreciate. Indeed 7 Steps to Wealth uses Warren Buffet's secret of compound growth but adapted for Australian property investors. Fitzgerald proves that certain residential land is Australia's best growth asset — and will continue to be given current record population growth. • Unlock the secret power of compound growth and make it work for you • Avoid the common mistakes that most property investors make • Read case studies and testimonials from millionaires using the 7 step strategies • Understand how to safely build wealth in property, be cashflow positive and still get a tax deduction. With Australia's record population growth, there is no better time for Australians to use this proven strategy to safely build wealth for a comfortable retirement, one that doesn't mean relying on government welfare.

New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. With award-winning writing and photography covering everything from politics and food to theater and fashion, the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself, while celebrating New York as both a place and an idea.

Gavin Hamilton Green, the well-known proprietor of Ye Olde Curiosity Shoppe in Goderich, describes the areas colourful pioneer history.

In most societies of the world, including in Africa, responsibility for the material support of older people unable to sustain themselves through work or investments originally resided with their younger generational family members--especially their adult children. Aboderin explores this topic specifically for Africa. In the wake of social or economic change, societies experience shifts in the degree to which families support their elders. Questions about the proper balance of family and state responsibility, however, persist, especially in light of socio-demographic trends and constraints in public expenditure. In most of sub-Saharan Africa, in contrast to other world regions, economic security policies for older people

have not yet been formulated, despite declines in material family support along with rising poverty to which a growing elderly population is exposed. In part, this betrays the crucial lack of understanding about how and why these shifts in support have occurred in African societies--and, thus, a profound uncertainty about what balance of individual, family, and state responsibilities will be culturally appropriate and effective in ensuring economic security for older Africans both now and in the future. Aboderin aims to address these gaps in understanding. She provides an empirical and theoretical analysis of the micro and macro level processes that have underpinned recent declines in old age family support in African societies and likely parameters of future familial support. She also addresses more fundamental theoretical questions about how we should think about the relationships between intergenerational support, norms and values, and societal change. *Intergenerational Support in Africa* will be of interest to students of African studies, economic policy and theory concerning eldercare, sociology, and social welfare development.
