This work remains a pioneer sociological treatise on American culture. By understanding the individual not as the product of society but as its mirror image, Cooley concludes that the social order cannot be imposed from outside human nature but that it arises from the self. Cooley stimulated pedagogical inquiry into the dynamics of society with the publication of *Human Nature and the Social Order* in 1902. *Human Nature and the Social Order* is something more than an admirable ethical treatise. It is also a classic work on the process of social communication as the "very stuff" of which the self is made.

Human Nature And Conduct John Dewey "Give a dog a bad name and hang him." Human nature has been the dog of professional moralists, and consequences accord with the proverb. Man's nature has been regarded with suspicion, with fear, with sour looks, sometimes with enthusiasm for its possibilities but only when these were placed in contrast with its actualities. It has appeared to be so evilly disposed that the business of morality was to prune and curb it it would be thought better of if it could be replaced by something else. It has been supposed that morality would be quite superfluous were it not for the inherent weakness, bordering on depravity, of human nature. Some writers with a more genial conception have attributed the current blackening to theologians who have thought to honor the divine by disparaging the human. Theologians have doubtless taken a gloomier view of man than have pagans and secularists. But this explanation doesn't take us far. For after all these theologians are themselves human, and they would have been without influence if the human audience had not somehow responded to them. Morality is largely concerned with controlling human nature. When we are attempting to control anything we are acutely aware of what resists us. So moralists were led, perhaps, to think of human nature as evil because of its reluctance to yield to control, its rebelliousness under the yoke. But this explanation only raises another question. Why did morality set up rules so foreign to human nature? The ends it insisted upon, the regulations it imposed, were after all outgrowths of human nature. Why then was human nature so averse to them? Moreover rules can be obeyed and ideals realized only as they appeal to something in human nature and awaken in it an active response. Moral principles that exalt themselves by degrading human nature are in effect committing suicide. Or else they involve human nature in unending civil war, and treat it as a hopeless mess of contradictory forces. We are forced therefore to consider the nature and origin of that control of human nature with which morals has been occupied. And the fact which is forced upon us when we raise this question is the existence of classes. Control has been vested in an oligarchy. Indifference to regulation has grown in the gap which separates the ruled from the rulers. Parents, priests, chiefs, social censors have supplied aims, aims which were foreign to those upon whom they were imposed, to the young, laymen, ordinary folk a few have given and administered rule, and the mass have in a passable fashion and with reluctance obeyed. Everybody knows that good children are those who make as little trouble as possible for their elders, and since most of them cause a

good deal of annoyance they must be naughty by nature. Generally speaking, good people have been those who did what they were told to do, and lack of eager compliance is a sign of something wrong in their nature.

and those which condone offense on account of the share of social conditions in producing bad disposition, are equally ways of making an unreal separation of man from his surroundings, mind from the world. ...To content ourselves with pronouncing judgments of merit and demerit without reference to the fact that our judgments are themselves facts which have consequences and that their value depends upon their consequences, is complacently to dodge the moral issue, perhaps even to indulge ourselves in pleasurable passion just as the person we condemn once indulged himself. About John Dewey, the Author: Dewey's most significant writings were 'The Reflex Arc Concept in Psychology' (1896), a critique of a standard psychological concept and the basis of all his further work; Democracy and Education (1916), his celebrated work on progressive education; Human Nature and Conduct (1922), a study of the function of habit in human behavior; The Public and its Problems (1927), a defense of democracy written in response to Walter Lippmann's The Phantom Public (1925); Experience and Nature (1925), Dewey's most 'metaphysical' statement; Art as Experience (1934), Dewey's major work on aesthetics; A Common Faith (1934), a humanistic study of religion originally delivered as the Dwight H. ...While some psychology historians consider Dewey more of a philosopher than a bona fide psychologist, the authors noted that Dewey was a founding member of the A.P.A., served as the A.P.A.'s eighth President in 1899, and was the author of an 1896 article on the reflex arc which is now considered a basis of American functional psychology. Understanding Human Nature was an attempt to acquaint the general public with the fundamentals of Individual Psychology. Adler explores human personality from all angles – how character develops, the nature of the psyche, how we see the world and how we become who we are. He believed that the work of understanding should not be the preserve of psychologists alone, but a vital undertaking for everyone to pursue, given the bad consequences of ignorance. This approach to psychology was unusually democratic for psychoanalytic circles. It is a work that anyone can read and understand.
