A little boy expresses his pride at the things he can do on his own, yet recognizes that sometimes he still feels very small.

Long a favorite on dance floors in Latin America, the porro, cumbia, and vallenato styles that make up Colombia's música tropical are now enjoying international success. How did this music—which has its roots in a black, marginal region of the country—manage, from the 1940s onward, to become so popular in a nation that had prided itself on its white heritage? Peter Wade explores the history of música tropical, analyzing its rise in the context of the development of the broadcast media, rapid urbanization, and regional struggles for power. Using archival sources and oral histories, Wade shows how big band renditions of cumbia and porro in the 1940s and 1950s suggested both old traditions and new liberties, especially for women, speaking to a deeply rooted image of black music as sensuous. Recently, nostalgic, "whitened" versions of música tropical have gained popularity as part of government-sponsored multiculturalism. Wade's fresh look at the way music transforms and is transformed by ideologies of race, nation, sexuality, tradition, and modernity is the first book-length study of Colombian popular music.

Complete Collection of Poetry and Prayers from the Carvajal Clan of Jews in Colonial Mexico City Presented in Spanish with Full English Translation Jewish Martyrs – Burned at the Stake for the Laws of Moses All of the Poetry from the Original Inquisition Trial Transcripts of Luis de Carvajal, el Mozo Leonor de Andrada Isabel Rodríguez Justa Mendez Francesca de Carvajal Manuel de Lucena and Leonor de Cáceres With excerpts from the trials of Sebastián Rodríguez, Lic. Manuel López de Morales, Francisco López Blandón, and others. Cantico 6 from Leonor de Carvajal Cuan suave cossa es deleytossa muy mas que nayde save ymaginar seguir aquella via muy gloriossa por donde Dios nos manda caminar toda la ley de Dios es muy sabrossa y aquel que la ossare blasfemar blasfemados sera en aquella vida a donde no ay tiempo cierto ni medida... How pleasant it is, how delightful, much more than anybody knows to imagine to follow this very glorious path whereby God commands us to walk; the whole law of God is very pleasant, and he who dares to blaspheme, cursed will they be in that life where there is no certain time nor measure... Keeping Judaism Alive After 100 Years in Exile A century after being expelled from Portugal, cryptoJews in Mexico, false converts to Christianity, could not speak of their beliefs for fear of becoming embroiled in the imprisonment, torture, and death in

flames that characterized the Inquisition. Without written texts, the Jewish liturgy lost, clans of cryptoJews created a unique body of religious poetry, connecting them to the Laws of Moses, seeking redemption from sin, or hoping for an escape from their embittered lives. The Carvajal clan was led by Luis el Mozo, an alumbrado, a mystic, and his Judaizing sisters. Once discovered to be secretly practicing Judaism, years of suffering at the hands of the Inquisitors were meticulously recorded in the transcripts of their long demeaning trials. The Carvajal's friends, spouses, children and grandchildren were implicated as Judaizers, with many being reconciled by the Church to secular authorities to be burned alive at massive public ceremonies. The burning of Luis and his sisters was the main attraction for cheering crowds at the auto de fé of 1596 in Mexico City. The cruelty of the Inquisitors was matched by their attention to legal detail and testimonies made at trial. Buried within thousands of pages of transcripts, hiding in library special collections of rare books around the world are the only remnants of the religious poetry that sustained cryptoJews hiding in Mexico. Anthology uncovers these hidden treasures! Keeping Judaism Alive Today, 400 Years Later There is intrinsic historical value in preserving this richest cultural remnant of a Jewish sect from the risk and obscurity of single-copy documents in library special collections. The poems are moving and beautiful, depicting a deep

faith in the Lord and a constant striving to live more virtuously to gain His favor. Poems from the tongues of Jewish martyrs, that gave up everything, including their lives, withstanding torture and years of imprisonment, but refusing to abandon the Laws of Moses.

Juan Valera y Alcalá-Galiano (1824-1905), one of 19th-century Spain's most well known authors, had a career in the diplomatic service with postings in Europe and the Americas. A serious student of his own and foreign literatures, Valera wrote novels, short stories, essays and literary criticism. Fluent in a number of languages, he also translated Longus's Daphne and Chloe from Greek into Spanish. The unifying thread of his creative work is "art for art's sake," that is, beauty as the end and purpose of imaginative literature, an ideal epitomised by Pepita Jiménez , long considered one of the best half dozen novels of 19th-century Spain. When it was first published in 1874, Pepita Jiménez became an instant success. Translations abound, as do the number of editions, upwards of fifteen, many of them annotated, some of them illustrated. It tells of Luis de Vargas, a devout twenty-two-year-old seminarian who has come home to visit with his father before entering the priesthood. The storyline unfolds when he meets a comely twenty-year-old widow named Pepita Jiménez and has his religious calling put to the test. On the heels of a fictitious prologue, Valera gives

the reader multiple perspectives. The first part of the novel is epistolary in form, letters that Luis writes to the Dean, who is both his uncle and his mentor at the seminary, and everything - people, places, and activities - is filtered through his eyes. The second part reverts to the traditional all-seeing narrator of the realist novel, while the third consists of letters that Pedro de Vargas, Luis's father, writes to his brother the Dean.

Although society considers him a misfit, a young boy is gradually accepted because of his special gift.

Quantification is central to human experience (cf. Aristotle's *Organon*): the most basic aspects of human life and reasoning involve quantity assessment. This study sheds lights on a highly frequent way to express quantification in Spanish, viz. the binominal quantifier (e.g. un aluvión<sub>N1</sub> de llamadas<sub>N2</sub> 'a flood of calls') which assesses the quantity of N2 in terms of N1. This volume offers a corpus-based, cognitive-functional analysis of binominal quantifiers (BQ) in Spanish. The first part is dedicated to the development of BQs and starts from the assumption that BQs are cross-linguistically involved in grammaticalization. This monograph frames the history of BQs in Spanish in terms of constructional levels of change and highlights the complex interplay between analogical thinking and conceptual persistence. The second part motivates both the ample variation in the paradigm

of quantifying nouns and their combinatorial pattern by the very same mechanism of conceptually-driven analogy. The study thus yields an innovative functional model of BQs in Spanish, in synchrony and in diachrony, with major implications for reference grammars and theory building.

Astronomy is a scientific discipline that has developed a rapid and impressive growth in Spain. Thirty years ago, Spain occupied a purely anecdotal presence in the international context, but today it occupies the eighth position in the world in publication of astronomical articles, and, among other successes, owns and operates ninety per cent of the world's largest optical telescope GTC (Gran Telescopio Canarias). The Eighth Scientific Meeting of the Spanish Astronomical Society (Sociedad Española de Astronomía, SEA), held in Santander in July 7–11 2008, whose proceedings are in your hands, clearly shows the enthusiasm, motivation and quality of the present Spanish astronomical community. The event brought together 322 participants, who represent almost 50% of Spanish professional astronomers. This percentage, together with the continuously increasing, with respect to previous SEA meetings, number of oral presentations and poster contributions (179 and 127 respectively), confirms that the SEA conferences have become a point of reference to assess the interests and

achievements of astrophysical research in Spain. The most important and current topics of modern Astrophysics were taken into account at the preliminary meeting, as well as the number and quality of participants and their contributions, to select the invited speakers and oral contributors. We took a week to enjoy the high quality contributions submitted by Spanish astronomers to the Scientific Organizing Committee. The selection was difficult. We wish to acknowledge the gentle advice and commitment of the SOC members.
