David Dyer's astonishing novel The Midnight Watchis based on the true story of the SS Californian, the ship that sawtheTitanic'sdistress rockets and yet, unfathomably, did nothing. A psychological thriller. Sometimes the smallest of human failings can lead to the greatest of disasters On a wretchedly cold night in the North Atlantic, a steamer stopped in an icefield sees the glow of another ship on the horizon. Just after midnight the first of eight distress rockets is fired. Why did theCalifornian look on while theTitanicsank? As soon as Boston Americanreporter John Steadman lays eyes on the man who stood the midnight watch on the Californian, he knows there's another story lurking behind the official one. Herbert Stone must have seen something, and yet his ship did nothing while the calamity took place. Now Stone, under his captain's orders, must carry his secret in silence, while Steadman is determined to find it out. So begins a strange dance around the truth by these three men. Haunted by the fifteen hundred who went to their deaths in those icy waters, and by the loss of his own baby son years earlier, Steadman must either find redemption in the Titanic's tragedy or lose himself. Based on true events, The Midnight Watchis at once a heart-stopping mystery and a deeply knowing novel - about the frailty of men, the strength of women, the capriciousness of fate and the price of loyalty.

Review: "This book is a fantastic guide to online marketing, and the Internet in general. As a marketing practitioner, I've been finding my way own way through the online world for some time now but have always wondered if what I was doing was 'correct' and it would take me ages to find out what I needed to know through researching online articles, blogs, etc. I found this book to be fairly concise and focused. The references to other online articles that it includes are vast and can they be very absorbing. The best part about this is that it is written by

someone that clearly has vast experience in the field and, unlike with some online articles, you get the feeling that what is advised is really 'best practice'.
