“Over the years Colombian tax officials have received the benefit of first-class advice of leading foreign scholars. In return, these scholars—and indeed everyone concerned with development policy—have gained a great deal both from the unusual willingness of Colombians to consider new ideas in detail and then, after full public discussion, drawing on the work of these experts to design a 'made-in-Colombia' solution. “[The book's] most important contribution, however, is undoubtedly with respect to consumption taxes. No one, anywhere, has thought through with such care just how the so-called 'simplified alternative tax' (essentially a direct personal consumption tax combined with a cash-flow corporate tax) might work in the real world. Since such taxes are increasingly being considered—if not adopted—all over the world, in developing and developed countries alike, for this reason alone this book should be high on the reading list of all those concerned with the design and implementation of efficient and equitable direct tax systems.”—From the Foreword by Richard M. Bird

This book is an invitation to study managerial uses of accounting information. Three themes run throughout. First, the accounting system is profitably thought of as a library of financial statistics. Answers to a variety of questions are unlikely to be found in prefabricated format, but valuable information awaits those equipped to interrogate the library. Second, the information unlikely to be the only information at the manager's disposal. So knowing how to combine accounting and nonaccounting bits of information is an important, indeed indispensable, managerial skill. Finally, the role of a professional manager is emphasized. This is an individual with skill, talent, and imagination, an individual who brings professional quality skills to the task of managing. This book also makes demands on the reader. It assumes the reader has had prior exposure to financial accounting, economics, statistics, and the economics of uncertainty (in the form of risk aversion and decision trees). A modest acquaintance with strategic, or equilibrium, modeling is also presumed, as is patience with abstract notation. The book does not make deep mathematical demands on the reader. An acquaintance with linear programming and the ability to take a simple derivative are presumed. The major prerequisite is a tolerance for (if not a predisposition toward) abstract notation. This style and list of prerequisites are not matters of taste or author imposition.

This highly regarded reference is relied on by a considerable part of the accounting profession in their day-to-day work. This comprehensive resource is widely recognized and relied on as a single reference source that provides answers to all reasonable questions on accounting and financial reporting asked by accountants, auditors, bankers, lawyers, financial analysts, and other preparers and users of accounting information. The new edition reflects the new FASB Codification, and includes expanded coverage of fair value and guidance on developing fair value estimates, fraud risk and exposure, healthcare, and IFRS.

?This book contains a collection of research papers on accounting information systems including their strategic role in decision processes, within and between companies. An accounting system is a complex system composed of a mix of strictly interrelated elements such as data, information, human resources, IT tool, accounting models and procedures. Accounting information systems are often considered the instrument by default for accounting automation. This book aims to sketch a clear picture of the current state of AIS research, including design, acceptance and reliance, value-added decision making, interorganizational links, and process improvements. The contributions in this volume emphasize that AIS has grown into a powerful strategic tool. The book provides evidence for this observation by

examining a wide range of current issues ranging from theory development in AIS to practical applications of accounting information systems. In particular it focuses on themes of growing interest in the realm of XBRL and Financial Reporting, Management Information Systems, IT/IS Audit and IT/IS Compliance. The book will be of interest to financial and managerial accountants and IT/IS practitioners, including information systems managers and consultants.

First published in 1997. Routledge is an imprint of Taylor & Francis, an informa company.

Accounting Information for Business Decisions is a business-focused introduction to Accounting for all students - not just those intending to be Accounting majors. Lead students through the real-world business cycle and how accounting information informs decision-making. Departing from the traditional approach taken by other introductory accounting textbooks, students apply both managerial and financial approaches within the topics examined in each chapter, to see the direct impact that Managerial Accounting decisions make on the Financial Accounting processes (and vice versa). The conversational writing engages students in the theoretical content and how it applies to contemporary real-world scenarios. Students follow a retail coffee business in the relatable Cafe Revive running case study integrated into every chapter, to learn about applying accounting issues in the real world. Security Analysis, Portfolio Management, and Financial Derivatives integrates the many topics of modern investment analysis. It provides a balanced presentation of theories, institutions, markets, academic research, and practical applications, and presents both basic concepts and advanced principles. Topic coverage is especially broad: in analyzing securities, the authors look at stocks and bonds, options, futures, foreign exchange, and international securities. The discussion of financial derivatives includes detailed analyses of options, futures, option pricing models, and hedging strategies. A unique chapter on market indices teaches students the basics of index information, calculation, and usage and illustrates the important roles that these indices play in model formation, performance evaluation, investment strategy, and hedging techniques. Complete sections on program trading, portfolio insurance, duration and bond immunization, performance measurements, and the timing of stock selection provide real-world applications of investment theory. In addition, special topics, including equity risk premia, simultaneous-equation approach for security valuation, and Itô's calculus, are also included for advanced students and researchers.

This revised and updated fifth edition of Accounting for Managers builds on the international success of the previous editions in explaining how accounting is used by non-financial managers. Emphasizing the interpretation rather than the construction of accounting information, Accounting for Managers encourages a critical, rather than an unthinking acceptance of accounting techniques. Whilst immensely valuable for planning, decision-making and control, users of accounting information need to recognize the assumptions behind, and the limitations of particular accounting techniques. As in the previous editions, the book links theory with practical examples and case studies drawn from real business situations across a wide range of manufacturing, retail and service industries.

USING FINANCIAL ACCOUNTING INFORMATION, 7/E, is a non-debit/credit text known for its strong decision-making focus and its incorporation of flagship companies for increased relevance. The student-friendly presentation and innovative transaction analysis of the new edition ensures students master financial accounting concepts and the role of those concepts in business decision making. USING FINANCIAL ACCOUNTING INFORMATION, 7/E, is a complete teaching system with numbered Examples tied to end-of-chapter homework for step-by-step learning, POD Reviews at the end of every section that provide instant feedback to students to help them master key concepts, as well as CengageNOW technology that contains gradable, algorithmic homework activities. Also new is a better and more intuitive system for notating transactions, so students understand better how each transaction affects the financial statements. This edition includes a discussion of the current environment of financial reporting, specifically the International Financial Reporting Standards. Best of all, you can completely customize FINANCIAL ACCOUNTING: THE IMPACT ON DECISION MAKERS to include the content you want to cover and in the same sequence as your syllabus. This third edition has been updated to reflect current accounting standards. It uses a decision-making approach as the foundation for explaining the need for, and the role of, accounting information in a modern economy. It also aims to teach students how to become good accounting technicians and to help them to understand why the double entry paradigm is used and what the resulting financial statements mean. This edition has been condensed from 18 to 14 chapters and it has adopted a modular approach to topic presentation. The financial analysis chapter is based on an actual corporate annual report (from Caterpillar). The book-keeping examples are carried through from chapters 3 to 6. There is a summary of highlights at the end of each chapter.

The new eighth edition of Financial Accounting: Tools for Decision-Making, Canadian Edition by Kimmel, Weygandt, Kieso, Trenholm, Irvine and Burnley continues to provide the

best tools for both instructors and students to succeed in their introductory financial accounting class. It helps students understand the purpose and use of financial accounting, whether they plan to become accountants or whether they simply need it for their personal life or career. The book's unique, balanced procedural and conceptual (user-oriented) approach, proven pedagogy and breadth of problem material has made Financial Accounting the most popular introductory text in Canada. This hands-on text, paired with a powerful online teaching and learning environment offers students a practical set of tools for use in making business decisions based on financial information.

News Professor Cheng-Few Lee ranks #1 based on his publications in the 26 core finance journals, and #163 based on publications in the 7 leading finance journals (Source: Most Prolific Authors in the Finance Literature: 1959–2008 by Jean L Heck and Philip L Cooley (Saint Joseph's University and Trinity University)). Based on the authors' extensive teaching, research and business experiences, this book reviews, discusses and integrates both theoretical and practical aspects of financial planning and forecasting. The book is divided into six parts: Information and Methodology for Financial Analysis, Alternative Finance Theories and Their Application, Capital Budgeting and Leasing Decisions, Corporate Policies and Their Interrelationships, Short-term Financial Decisions, Financial Planning and Forecasting, and Overview. The theories used in this book are pre-Modigliani–Miller Theorem, Modigliani–Miller Theorem, Capital Asset Pricing Model and Arbitrage Pricing Theory, and Option Pricing Theory. The interrelationships among these theories are carefully analyzed. Meaningful real-world examples of using these theories are discussed step-by-step, with relevant data and methodology. Alternative planning and forecasting models are also used to show how the interdisciplinary approach is helpful in making meaningful financial management decisions.
